

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS,
INFECTIOUS DISEASES,
WEATHER REPORT

WEEK ENDED

SATURDAY, 8th JANUARY, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and IV) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

Annual Numbers and rates of live births, stillbirths and *total* deaths—about the third week in January.

Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

SPECIAL NOTES

From the first week of 1949 cases of food poisoning notified under section 17 of the Food and Drugs Act, 1938, are included in Table IV. From that date also publication of weekly meteorological data, which was suspended in 1939, has been resumed (*see* Tables V and VI).

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Oct. 30	Nov. 6	Nov. 13	Nov. 20	Nov. 27	Dec. 4	Dec. 11	Dec. 18	Dec. 25	Jan. 1	Jan. 8	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 8th January, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

TABLE IV.—continued.

DATE.	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
Sunday 2	1.4	7.9	Few clouds until 6h., then overcast generally. Intermittent rain from 15½h. Strong wind until 5h., fresh until 8h.
Monday 3	1.3	8.0	Overcast until 3h., then little cloud. Nearly overcast period 11½h.—13½h. Rain until 0½h. Mist 5h.—13½h., then slight mist.
Tuesday 4	0 0	8.0	Nearly cloudless until 1h., overcast generally from 1½h. Slight sleet 4½h., then rain or drizzle until 12½h. Showery 17½h.—22h. Hoar frost in morning. Mist from 14h.
Wednesday 5	0.0	8.0	Overcast generally until 17h., cloudless by 18h. Sky veiled from 2½h. Misty. Hoar frost at night.
Thursday 6	0.0	8.0	Overcast generally. Few thin clouds 20½h.—23h. Mist until 20h. Dew at night.
Friday 7	0.0	8.1	Overcast generally. Damping from 17h. Dew in morning.
Saturday 8	1.1	8.1	Overcast. Few clouds from 5h., clouding 10½h., overcast generally from 11h., clearing 17½h., cloudless from 18h. Few clouds period 15½h.—16½h. Drizzle 0½h.—4½h. Slight rain 12½h.—13½h. Hoar frost at night. Mist in morning.
Sum 3.8		Sum 56.1	
No. of Column 25		26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1903, and the of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh*t sunshine on each day.

The reading of the barometer increased from 28.55 ins. at the beginning of the week to 29.57 ins. by 0½h. on January 4; decreased to 29.27 ins. by 12½h. on January 4; increased to 29.39 ins. by 23h. on January 6; decreased to 29.83 ins. by 2h. on January 8; increased and was 30.22 ins. by midnight on the same day.

1949 No. 2

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 15th JANUARY, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931: "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.

Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ENGLAND AND WALES

BIRTHS AND DEATHS registered in the Quarter ended 31st December, 1948, and in the year 1948. (The customary analysis will appear in the Quarterly Return in due course).

	LIVE BIRTHS		STILLBIRTHS		DEATHS (including non-civilians)		DEATHS OF INFANTS UNDER 1 YEAR

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 15th January, 1949, with totals from the first week of the year to date. } **London.**

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Cause of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 15th January, 1949.

England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the “Others” column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenza).	A	B	D	E	F	G	H	I	J	L	M	N	C	O	P	R	S
						Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute polioencephalitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.		Sun above Horizon in hours.		GENERAL REMARKS.
JANUARY, 1949.						
Sunday	.. 9	4.1	8.1	Few clouds until 19h., then sky veiled. Misty until 20h., then fog. Hoar frost morning and night.		
Monday	.. 10	0.0	8.1	Sky veiled until 1½h., then overcast generally. Fog until 2h., then misty. Hoar frost in morning.		
Tuesday	.. 11	0.4	8.2	Overcast until 7h., nearly so until 16h., then nearly cloudless. Rain 9½h. until 10h. Slight mist throughout.		
Wednesday	.. 12	3.6	8.2	Nearly cloudless generally. Slight mist or haze until 18h., then mist. Hoar frost morning and night.		
Thursday	.. 13	1.1	8.2	Nearly cloudless until 3h., generally cloudy until 13h., then overcast. Misty. Hoar frost in morning.		
Friday	.. 14	0.0	8.3	Overcast generally. Rain or slight rain 19½h. until 20½h., and from 22½h. Misty.		
Saturday	.. 15	0.0	8.3	Overcast. Rain or slight rain until 2½h. Frequent drizzle 10½h. until 18½h. Mist. fog between 5h. and 17h.		
		Sum 9.2	Sum 57.4			

67 NOV 16
1949
1903

The results apply to the civil day of from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brilliant* sunshine on each day.

The reading of the barometer increased from 30.22 ins. at the beginning of the week to 30.24 ins. by 20½h. on January 9; decreased to 29.59 ins. by 14h. on January 11; increased to 30.34 ins. by 9½h. on January 13; decreased and was 30.03 ins. by midnight on January 15.

1949 No. 3

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 22nd JANUARY, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

GENERAL NOTES

1. Introduction.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. Definitions of areas.—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946. i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review. Tables, Part I (Medical)

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenza pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 22nd January, 1949, with totals from the first week of the year to date. } **London.**

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Cause of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in } **England and Wales, Administrative**
the week ended 22nd January, 1949. } **Areas and Port Health Districts.**

(see General notes on page 2)

*Note:—*Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	D	E.	F	G	H	I	J	L	M	N	O	P	R	S

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
JANUARY, 1949.				
Sunday	.. 16	0.0	8.4	Overcast generally. Rain 22½h. until 23¾h. Misty.
Monday	.. 17	0.6	8.4	Overcast or nearly so. Fresh wind 10h. until 20h. Slight mist.
Tuesday	.. 18	0.6	8.5	Nearly overcast generally. Mist in morning. Fresh wind from 16h.
Wednesday	.. 19	1.0	8.5	Nearly overcast. Fresh wind until 23h., strong between 11h. and 19h. Rain from 23½h.
Thursday	.. 20	1.1	8.6	Very cloudy. Rain until 0½h. Fresh wind from 11h.
Friday	.. 21	1.6	8.6	Generally cloudy until 22h., then few clouds. Fresh wind until 16h.
Saturday	.. 22	0.5	8.6	Few clouds, clouding 17h. to nearly overcast by 17¾h. Damping 21h. Fog until 11½h., then misty. Hoar frost in morning.
No. of Column		Sum 5.4	Sum 59.6	
		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 30.03 ins. at the beginning of the week to 29.94 ins. by 6½h. on January 16; increased to 30.04 ins. by 20½h. on January 16; decreased to 29.80 ins. by 13½h. on January 17; increased to 30.00 ins. by 8½h. on January 18; decreased to 29.79 ins. by 19½h. on January 19; increased to 29.94 ins. by 8½h. on January 20; decreased to 29.86 ins. by 15½h. on January 20; increased to 30.23 ins. by 10½h. on January 22; decreased and was 30.18 ins. by midnight on the same day.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 29th JANUARY, 1949

GENERAL NOTES

1. Introduction.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. Definitions of areas.—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.

Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ENGLAND AND WALES.

Monthly Statement of Deaths from Smallpox.

There were no deaths from Smallpox registered in England and Wales during the month of December last.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Nov. 20	Nov. 27	Dec. 4	Dec. 11	Dec. 18	Dec. 25	Jan. 1	Jan. 8	Jan. 15	Jan. 22	Jan. 29	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 29th January, 1949, with totals from the first week of the year to date. } London.

TABLE VI.—continued.

DATE	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
JANUARY, 1949			
Sunday 23	1.7	8.7	Overcast until 10½h., cloudy until 16h., then few clouds.
Monday 24	0.0	8.7	Few clouds until 3h., then overcast. Hoar frost in morning. Drizzle 9½h. until 13h. Mist 6h. until 16h.
Tuesday 25	4.7	8.8	Overcast until 9h., then little cloud.
Wednesday 26	0.0	8.8	Little cloud until 7½h., nearly overcast until 16h., then partially cloudy. Hoar frost in morning. Mist or fog from 5h.
Thursday 27	6.7	8.9	Variably cloudy until 7h., then cloudless. Mist or fog until 11½h., and 17h. until 24h. Hoar frost in morning.
Friday 28	7.0	9.0	Cloudless generally. Hoar frost morning and night. Fog 7h. until 12h. and mist from 19h.
Saturday 29	4.5	9.0	Few clouds and foggy.
No. of Column	Sum 24.6	Sum 61.9	
	25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that "higher" indicates "higher" and "lower" than the average. The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 30.18 ins. at the beginning of the week to 30.03 ins. on 6 January 24; increased to 30.35 ins. by 23½h. on January 24; decreased to 30.15 ins. by 6½h. on January 26; increased and was 30.55 ins. by midnight on January 29.

1949 No. 5

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 5th FEBRUARY, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

GENERAL NOTES

1. Introduction.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. Definitions of areas.—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical)

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 5th February, 1949, with totals from the first week of the year to date. } **London.**

(see General notes on page 2)

TABLE VI.—continued.

DATE	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
JANUARY, 1949.			
Sunday 30	0.4	9.0	Cloudless until 7h., cloudy until 14h., few clouds until 17h., then overcast. Hoar frost in morning. Mist or fog throughout.
Monday 31	0.0	9.1	Overcast generally. Drizzle 19h. until 21h. Hoar frost in morning. Fog until 12h., then mist until 19h.
FEBRUARY, 1949.			
Tuesday 1	0.4	9.1	Nearly overcast throughout.
Wednesday 2	3.1	9.2	Nearly overcast until 2h., then little cloud. Hoar frost morning and night. Fog 6h. until 11h.
Thursday 3	7.2	9.3	Cloudless. Hoar frost and mist in morning and at night.
Friday 4	7.6	9.3	Cloudless. Mist or fog until 10h. and from 19h. Hoar frost morning and night.
Saturday 5	7.1	9.4	Cloudless. Mist or fog until 13h. Hoar frost morning and night.
No. of Column	Sum 25.8	Sum 64.4	
	25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brilliant* sunshine on each day.

The reading of the barometer increased from 30.55 ins. at the beginning of the week to 30.67 ins. by 11h. on January 30; decreased to 30.35 ins. by 19h. on January 31; increased to 30.63 ins. by 23h. on February 2; decreased and was 30.31 ins. by midnight on February 5.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 12th FEBRUARY, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931: "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical)

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 12th February, 1949, with totals from the first week of the year to date. } **London.**

(see General notes on page 2)

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 12th February, 1949.England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

TABLE VI.—continued.

DATE. 9 FEB 49		Registered Sunshine in hours.		Sun above Horizon in hours.		GENERAL REMARKS.
FEBRUARY, 1949.						
Sunday	6	7.3	9.4		Cloudless generally. Fog 7½h. until 12½h., then mist or haze. Hoar frost morning and night.
Monday	7	0.3	9.5		Little cloud until 3h., then overcast generally. Damping 14½h. until 19½h., rain or slight rain until 23½h. Mist until 10h. Fresh wind from 17h.
Tuesday	8	4.2	9.5		Overcast until 3h. Nearly cloudless until 9½h., then cloudy. Sky veiled from 19h., overcast from 22½h. Fresh wind until 2h. and 9h. until 15h.
Wednesday	9	1.8	9.6		Overcast until 12h., cloudy until 16h., then cloudless. Rain 1½h. until 9½h. Wind rising 4h., moderate gale by 8h. Strong wind from 17h.
Thursday	10	6.1	9.7		Cloudless or nearly so. Fog from 19h. Strong wind until 1h., fresh wind until 4h.
Friday	11	0.8	9.7		Few clouds generally. Mist or fog throughout. Hoar frost in morning.
Saturday	12	0.9	9.8		Few clouds until 0½h., overcast until 14½h., cloudy until 17½h., cloudless by 18h. Hoar frost in morning. Rain 9½h. until 12½h. Shower with hail 14h.
			Sum 21.4	Sum 67.2		
No. of Column		25		26		

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brilliant* sunshine on each day.

The reading of the barometer decreased from 30.31 ins. at the beginning of the week to 29.79 ins. by 2½h. on February 8; increased to 30.01 ins. by 20½h. on February 8; decreased to 29.24 ins. by 9½h. on February 9; increased to 30.10 ins. by 11½h. on February 11; decreased to 29.73 ins. by 13½h. on February 12; increased and was 29.97 ins. by midnight on the same day.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931: "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

SPECIAL NOTE

There is included on this page for the first time a final forecast of the number of births to be expected in the current quarter and a provisional forecast of the number to be expected in the following quarter. It is hoped that similar forecasts will be published in this Return for succeeding quarters: the provisional forecast for the following quarter will in this way be replaced by the final forecast for that quarter.

FORECAST OF BIRTHS: ENGLAND AND WALES

(a) Final estimate of live births to be expected in the quarter ending 31st March, 1949	181,100.
(b) Provisional estimate of live births to be expected in the quarter ending 30th June, 1949	184,900.

In the above forecasts regard has been had to (1) sample returns of the number of special ration books issued to expectant mothers by the Ministry of Food, and (2) the recent trend of registered live births. The sample comprises some 200 Food Office areas containing about 25 per cent. of the population.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly	Deaths from smallpox—about the fourth week following the month.
Quarterly	Numbers and rates of live births, stillbirths, <i>total</i> deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
Annual	Numbers and rates of live births, stillbirths, <i>total</i> deaths, and deaths of children under one year of age—about the third week in January. Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 19th February, 1949, with totals from the first week of the year to date. } **London.**

TABLE VI.—continued.

DATE.		GENERAL REMARKS.	Sun above Horizon in hours.	Registered Sunshine in hours.
FEBRUARY, 1949.				
Sunday 13	Cloudless until 1½h., cloudy until 10h., then nearly overcast. Hoar frost in morning. Mist from 7h.	9.9	0.3
Monday 14	Overcast generally. Mist until 10h.	9.9	0.0
Tuesday 15	Overcast until 17h., then cloudy thin cloud.	10.0	0.0
Wednesday 16	Cloudy until 0½h., few clouds until 14h., then cloudless. Dew in morning. Mist from 18½h.	10.1	8.2
Thursday 17	Cloudless. Few clouds between 7h. and 14h. Mist until 10½h. and from 18h. Hoar frost in morning.	10.1	7.8
Friday 18	Little cloud until 14h., cloudy until 22h., then overcast. Hoar frost in morning. Rain at times 22h. until 0h.	10.2	6.4
Saturday 19	Overcast until 2h., cloudless by 3½h. Hoar frost in morning. Fog 7½h. until 10½h.	10.2	8.2
				Sum 30.9
No. of Column			Sum 70.4	25
			26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer increased from 29.97 ins. at the beginning of the week to 30.26 ins. by 14h. on February 16; decreased to 29.87 ins. by 164h. on February 18; increased to 30.18 ins. by 224h. on February 19, and remained steady until midnight on the same day.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 26th February, 1949, with totals from the first week of the year to date. } **London.**

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in England and Wales, Administrative Areas and Port Health Districts.
the week ended 26th February, 1949.

(see General notes on page 2)

*Note:—*Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	D	E	F	G	H	I	J	L	M	N	O	P	R	S
						Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute polioencephalitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

TABLE VI.—continued.

DATE.			Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
FEBRUARY, 1949.					
Sunday	..	20	7.2	10.3	Little cloud until 10½h., partially cloudy until 18h., then overcast. Hoar frost and fog in morning.
Monday	..	21	1.4	10.4	Overcast generally. Slight drizzle 9½h. until 11h. Rain 21½h. until 22½h.
Tuesday	..	22	5.1	10.4	Overcast, cloudless by 0½h. Few clouds 6h. until 11½h., then very cloudy. Fresh or strong wind from 8h.
Wednesday	..	23	0.0	10.5	Very cloudy until 4½h., then overcast. Rain 22h. until 22½h. Fresh wind until 14h.
Thursday	..	24	0.6	10.6	Overcast until 17h., then cloudy. Rain 1h. until 5h., then slight until 11h. Gloom 11h. until 11½h. Mist 6h. until 11h.
Friday	..	25	2.3	10.6	Cloudy or partially cloudy until 18h., then overcast. Mist and high fog in morning.
Saturday	..	26	1.6	10.7	Very cloudy generally. Fresh wind from 8h.
No. of Column			Sum 18.2	Sum 73.5	
			25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher", and — "lower", than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 30.18 ins. at the beginning of the week to 29.99 ins. by 16½h. on February 21; increased to 30.28 ins. by 11½h. on February 22; decreased to 30.15 ins. by 5h. on February 23; increased to 30.45 ins. by 10½h. on February 25; decreased and was 29.91 ins. by midnight on February 26.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ENGLAND AND WALES

Monthly Statement of Deaths from Smallpox

There were no deaths from Smallpox registered in England and Wales during the month of January last.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

† Dublin	195	?	110	7	-	-	-	13	1	-	6	3

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 5th. March, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 5th March, 1949.

England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the “Others” column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenza).	A	B	D	E	F	G	H	I	J	L	M	N	C	O	P	R	S
						Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute polioencephalitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
FEBRUARY, 1949.				
Sunday 27	2.8	10.8	Nearly overcast until 13½h., partially cloudy until 16h., then cloudless. Shower about 12h. with hail. Fresh wind until 5h. and 8h. until 18h.
Monday 28	3.4	10.8	Cloudless until 9h., partially cloudy until 14h., then very cloudy. Fog and high fog 5h. until 11h. Hoar frost in morning. Fresh wind 14h. until 19h., then strong.
MARCH				
Tuesday 1	8.3	10.9	Overcast until 7h., few clouds until 17h., then cloudless. Strong wind until 16h., then fresh. Moderate gale 1h. until 6h.
Wednesday 2	4.7	11.0	Cloudless until 7h., generally cloudy until 22h., then nearly cloudless. Fresh wind until 11h. Slight snow 14½h. until 15½h.
Thursday 3	4.7	11.0	Little cloud, nearly overcast period 13½h. until 16h. Mist and hoar frost in morning. High fog from 17h.
Friday 4	0.0	11.1	Few clouds and high fog until 1h., very cloudy until 8h., then overcast. Mist 0h. until 11h. Sleet 10½h. until 12h., then rain until 18½h.
Saturday 5	1.6	11.1	Overcast generally. Hoar frost in morning. Solar halo 8½h. until 12½h. Slight snow 21h.
		Sum 25.5	Sum 76.7	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 29.91 ins. at the beginning of the week to 29.84 ins. by 6h. on February 27; increased to 30.26 ins. by 9½h. on February 28; decreased to 29.63 ins. by 3½h. on March 1; increased to 30.45 ins. by 21½h. on March 2; decreased to 29.92 ins. by 16h. on March 4; increased to 30.11 ins. by 10½h. on March 5; decreased and was 29.97 ins. by midnight on the same day.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical)

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.

Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 12th March, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the “Others” column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
MARCH, 1949.				
Sunday 6	0.0	11.2	Overcast. Snow about 0h. Slight snow 6h. until 9h. and 14h. until 18h.
Monday 7	0.0	11.3	Overcast or nearly so.
Tuesday 8	0.0	11.4	Very cloudy generally. Fresh wind 8h. until 23h.
Wednesday 9	2.6	11.4	Nearly overcast until 13h., few clouds until 19h., sky veiled until 23h., then overcast.
Thursday 10	2.4	11.5	Very cloudy or nearly overcast.
Friday 11	0.7	11.5	Nearly overcast until 16½h., cloudless by 17h. Fog from 20h.
Saturday 12	0.0	11.6	Little cloud until 3h., overcast by 4h. Few clouds from 21½h. Hoar frost in morning. Fog until 1h., then mist until 11½h. Slight rain about 12h. and 20h.
		Sum 5.7	Sum 79.9	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh*t sunshine on each day.

The reading of the barometer decreased from 29.97 ins. at the beginning of the week to 29.66 ins. by 16½h. on March 7; increased to 29.89 ins. by 9h. on March 11; decreased and was 29.65 ins. by midnight on March 12.

1949 No. 11

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 19th MARCH, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

GENERAL NOTES

1. Introduction.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. Definitions of areas.—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 19th March, 1949, with totals from the first week of the year to date. } **London.**

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in England and Wales, Administrative Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	D	E	F	G	H	I	J	L	M	N	C	O	P	R	S

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
MARCH, 1949.				
Sunday 13	0.1	11.7	Few clouds until 4h., then overcast generally. Slight rain at times 9h. until 12½h. and rain 21½h. Fresh wind 7h. until 21h.
Monday 14	0.0	11.7	Overcast generally. Rain 12½h. until 17½h. Mist 16h. until 20h.
Tuesday 15	7.7	11.8	Cloudy until 2h., little cloud until 19½h., then nearly overcast. Mist in evening.
Wednesday 16	2.6	11.9	Nearly overcast until 13½h., cloudy until 16½h., little cloud until 23½h., then clouding over. Fresh or strong wind 3h. until 18h.
Thursday 17	2.5	11.9	Nearly overcast generally. Fresh wind 13h. until 22h., then strong.
Friday 18	4.0	12.0	Overcast until 6h., generally cloudy until 22h., then little cloud. Slight rain 11½h. until 12h. Shower 18½h. Strong wind until 3h., then fresh until 6h.
Saturday 19	7.6	12.1	Little cloud until 5h., partially cloudy until 16½h., cloudless by 18h. Hoar frost at night.
		Sum 24.5	Sum 83.1	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 29.65 ins. at the beginning of the week to 29.55 ins. by 16½h. on March 13; increased to 29.82 ins. by 8½h. on March 14; decreased to 29.64 ins. by 17½h. on March 14; increased to 30.22 ins. by 11½h. on March 15; decreased to 29.75 ins. by 14½h. on March 16; increased to 29.93 ins. by 1½h. on March 17; decreased to 29.66 ins. by 21½h. on March 17; increased and was 30.21 ins. by midnight on March 19.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 26th March, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
MARCH 1949.				
Sunday	20	12.1	Few clouds until 7h., then overcast generally. Hoar frost in morning. Rain from 23h. Mist 6h. until 10½h.
Monday	21	12.2	Overcast generally. Little cloud period 6h. until 13h. Rain until 3½h. Fog 20½h. until 24h.
Tuesday	22	12.3	Overcast throughout. Slight drizzle 9h. until 11h. Fog 6h. until 11h., then mist or slight mist.
Wednesday	23	12.3	Overcast until 17h., cloudless by 17½h. Slight mist generally. Dew at night.
Thursday	24	12.4	Cloudless; little cloud 7h. until 8½h. Dew and slight mist in morning.
Friday	25	12.5	Cloudless generally. Cloudy periods 11h. until 12h. and 16½h. until 18h. Mist or fog until 13h. and 20h. until 23h.
Saturday	26	12.5	Nearly cloudless until 13½h., nearly overcast by 14½h. Hoar frost in morning. Haze in forenoon. Mist at night.
No. of Column		25	26	
		Sum 26.3	Sum 86.3	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 30.21 ins. at the beginning of the week to 29.94 ins. by 3h. on March 21; increased to 30.40 ins. by 9h. on March 23; decreased to 29.92 ins. by 15h. on March 25; increased and was 30.10 ins. by midnight on March 26.

1949 No. 13

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 2nd APRIL, 1949

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931: "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ENGLAND AND WALES

Monthly Statement of Deaths from Smallpox

There were no deaths from Smallpox registered in England and Wales during the month of February last.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note.—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 2nd April, 1949, with totals from the first week of the year to date. } **London.**

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
MARCH, 1949.				
Sunday 27	3.3	12.6	Overcast generally. Partially cloudy period 12½h. until 15½h.
Monday 28	0.0	12.7	Overcast. Mist 6h. until 14½h. and from 18h.
Tuesday 29	0.0	12.7	Overcast generally. Wet fog 0h. until 8½ h. then mist.
Wednesday 30	0.0	12.8	Overcast. Mist or fog until 14h. and from 21h.
Thursday 31	2.3	12.8	Overcast. Little cloud period 15h. until 18h. Mist or fog until 13h. Mist from 19h.
APRIL, 1949.				
Friday 1	4.8	12.9	Overcast until 10½h., little cloud until 17h., then overcast. Mist until 11h., thick fog between 2h. and 8h. Fog from 22½h.
Saturday 2	4.8	13.0	Overcast. Little cloud period 9½h. until 13h. Fog until 9h. Rain from 19½h.
No. of Column		Sum 15.2	Sum 89.5	
		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brilliant* sunshine on each day.

The reading of the barometer increased from 30.10 ins. at the beginning of the week to 30.13 ins. by 9½h. on March 27; decreased and was 29.74 ins. by midnight on April 2.

1949 No. 14

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 9th APRIL, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.

Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 9th April, 1949, with totals from the first week of the year to date. } **London.**

(see General notes on page 2)

TABLE VI.—continued.

DATE.	Registered Sunshine in hours.		Sun above Horizon in hours.		GENERAL REMARKS.
APRIL, 1949.					
Sunday	3	0.1	13.0		Overcast generally. Rain until 2h. Slight rain 16½h. until 21½h. Fresh wind 5h. until 11h., then strong.
Monday	4	4.7	13.1		Nearly overcast until 16½h., few clouds until 21h., then very cloudy. Rain about 2h. and showery 11½h. until 15h. Strong wind until 23h., gale at times 5h. until 11h. Thunder and lightning 13.05h.
Tuesday	5	0.2	13.2		Overcast generally. Occasional slight rain 13h. until 18h. Rain at times 20½h. until 22½h. Solar halo 10h. until 12h. Fresh wind from 16h.
Wednesday	6	1.0	13.2		Overcast generally. Rain about 3½h. and at times 13½h. until 22½h. Fresh wind until 6h.
Thursday	7	6.0	13.3		Overcast until 9h., cloudy until 15h.; few clouds until 22½h., then overcast. Rain 2½h. until 6½h. Showery 10½h. until 13½h. Strong wind 3h. until 9h., moderate gale until 18h. abating by 21h.
Friday	8	3.8	13.4		Overcast until 9h., cloudy until 22h., then cloudless. Showery 7½h. until 15½h. Sleet about 11h. and hail 11½h.
Saturday	9	10.7	13.4		Little cloud. Mist in morning.
No. of Column	25		26		
	Sum 26.5		Sum 92.6		

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh*t sunshine on each day.

The reading of the barometer decreased from 29.74 ins. at the beginning of the week to 29.44 ins. by 6h. on April 4; increased to 29.82 ins. by 9½h. on April 5; decreased to 28.94 ins. by 2½h. on April 7; increased to 30.20 ins. by 23½h. on April 9.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical)

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.

Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ENGLAND AND WALES

BIRTHS AND DEATHS registered in the Quarter ended 31st March, 1949, with comparative figures for the first Quarters of three earlier years. (The customary analysis will appear in the Quarterly Return in due course).

First Quarter of:—	LIVE BIRTHS.		STILLBIRTHS.		DEATHS (including non-civilians).		DEATHS of INFANTS under 1 year.	
	Number.	per 1,000 total population.	Number.	per 1,000 total live & stillbirths.	Number.	per 1,000 total population.	Number.	per 1,000 related live births.
1949	186,561	17.4	4,418	23.1	161,279	15.0	7,462	40

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Feb. 5	Feb. 12	Feb. 19	Feb. 26	Mar. 5	Mar. 12	Mar. 19	Mar. 26	Apr. 2	Apr. 9	Apr. 16	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

** Return not received.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 16th April, 1949, with totals from the first week of the year to date. } London.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
APRIL, 1949.				
Sunday 10	5.5	13.5	Little cloud until 8½h., cloudy thin cloud until 13h., then overcast generally. Hoar frost in morning. Slight rain 19¾h. until 20½h. and 22h. until 22¾.
Monday 11	5.7	13.6	Nearly overcast until 2½h., few clouds until 10h., sky veiled until 19h., then overcast. Solar halo at times 11h. until 17h. Fresh wind 9h. until 18h. and from 23h.
Tuesday 12	0.0	13.6	Overcast generally. Fresh wind until 21h.
Wednesday 13	6.8	13.7	Overcast until 10½h., little cloud until 16h. Thin cloud until 20¾h., then nearly overcast.
Thursday 14	9.8	13.8	Overcast until 2h., thin clouds until 13h., then nearly cloudless. Solar halo 10h. until 11h.
Friday 15	9.2	13.8	Few thin clouds. Lunar halo 1½h. until 2h.
Saturday 16	12.2	13.9	Cloudless generally.
		Sum 49.2	Sum 95.9	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh*t sunshine on each day.

The reading of the barometer decreased from 30.20 ins. at the beginning of the week to 29.68 ins. by 5h. on April 12; increased to 30.05 ins. by 9½h. on April 14; decreased to 29.79 ins. by 17½h. on April 16; increased and was 29.89 ins. by midnight on the same day.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS,
INFECTIOUS DISEASES,
WEATHER REPORT

WEEK ENDED

SATURDAY, 23rd APRIL, 1949

GENERAL NOTES

1. Introduction.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. Definitions of areas.—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical)

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ENGLAND AND WALES

Civilian Death-rates from Tuberculosis and Cancer and Maternal Mortality—1948

Provisional death-rates per million population for England and Wales during the year 1948 are as follows:—

	<i>Males</i>	<i>Females</i>	<i>Persons</i>
Respiratory Tuberculosis	555	335	440
Other Tuberculosis	72	62	67
Cancer	1,965	1,761	1,858

The maternal mortality (provisional) per 1,000 total live and stillbirths based on deaths primarily classed to diseases of pregnancy, childbirth and the puerperal state as arranged in the Manual of the International List (5th revision) is as follows:—

No. 140—Post-abortion infection	0.11
No. 141—Abortion without mention of septic conditions	0.05
No. 147—Infection during childbirth and the puerperium	0.13
Nos. 142—146 } Other maternal causes	0.73
Nos. 148—150 }	

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Feb. 12	Feb. 19	Feb. 26	Mar. 5	Mar. 12	Mar. 19	Mar. 26	Apr. 2	Apr. 9	Apr. 16	Apr. 23	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 23rd April, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1949.	Deaths registered during current week.											
			ALL AGES.	Under 1 year.	1-2 years.	2-5 years.	5-15 years.	15-25 years.	25-35 years.	35-45 years.	45-55 years.	55-65 years.	65-75 years.	75 years and upwards.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in England and Wales, Administrative Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

TABLE VI.—continued.

DATE.	Registered Sunshine in hours.		Sun above Horizon in hours.		GENERAL REMARKS.
APRIL, 1949.					
Sunday . . .	17	11.5	14.0		Cloudless or nearly so.
Monday . . .	18	10.9	14.0		Few clouds until 13½h., cloudy generally until 23h., then nearly cloudless.
Tuesday . . .	19	10.7	14.1		Little cloud until 11h., cloudy until 19h. then nearly overcast.
Wednesday . .	20	11.8	14.1		Nearly overcast until 5h., clearing to nearly cloudless by 5½h.
Thursday . . .	21	2.2	14.2		Little cloud until 3h., nearly overcast 4h. until 23h. then cloudless. Hoar frost in morning. Rain 16h. till 19½h. Fresh wind 19h. until 0h.
Friday . . .	22	8.8	14.3		Little cloud until 11h., cloudy until 20½h. cloudless from 21h. Hoar frost in morning. Solar halo 16h. till 17h.
Saturday . . .	23	13.0	14.3		Cloudless or nearly so.
No. of Column	Sum 68.9		Sum 99.0		
	25		26		

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh*t sunshine on each day.

The reading of the barometer increased from 29.89 ins. at the beginning of the week to 30.16 ins. by 7½h. on April 19; decreased to 29.98 ins. by 18½h. on April 19; increased to 30.07 ins by 7½h. on April 20; decreased to 29.49 ins. by 15½h. on April 21; increased to 30.11 ins by 23½h. on April 22; decreased and was 29.93 ins by midnight on April 23.

GENERAL NOTES

1. Introduction.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. Definitions of areas.—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical)

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 30th April, 1949, with totals from the first week of the year to date. } London.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 30th April, 1949.England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	Cholera.	A	B	D	E	F	G	H	I	J	L	M	N	O	P	R	S

TABLE VI.—continued.

DATE.	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
APRIL, 1949.			
Sunday 24	11.1	14.4	Nearly cloudless until 16h., overcast from 17h. Rain 19½h. until 23h.
Monday 25	6.1	14.5	Overcast until 7½h., cloudy until 19½h. then few clouds. Showers 13½h. and 14½h.
Tuesday 26	4.9	14.5	Cloudless until 4h., cloudy until 17h., nearly cloudless until 22½h., overcast by 23h. Shower 8½h.
Wednesday .. 27	5.0	14.6	Overcast generally. Cloudy period 5h. until 14h.
Thursday 28	0.0	14.7	Overcast. Slight drizzle 6h. until 7½h. Slight rain 18½h. until 20½h. then rain.
Friday 29	7.3	14.7	Overcast until 4h., then few clouds. Very cloudy period 14h. until 19h. Rain until 1½h.
Saturday 30	4.5	14.8	Little cloud until 3½h., generally cloudy until 20h. then nearly cloudless.
No. of Column	Sum 38.9	Sum 102.2	
	25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 29.93 ins. at the beginning of the week to 29.53 ins. by 3½h. on April 25; increased to 30.09 ins. by 7½h. on April 27; decreased to 29.87 by 20½ on April 28; increased and was 30.31 ins. by midnight on April 30.

1949 No. 18

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS,
INFECTIOUS DISEASES,
WEATHER REPORT

WEEK ENDED

SATURDAY, 7th MAY, 1949

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ESTIMATE OF BIRTHS: ENGLAND AND WALES

(a) Final estimate of live births to be expected in the quarter ending 30th June, 1949...	190,000.
(b) Provisional estimate of live births to be expected in the quarter ending 30th September, 1949 ...	178,000.

In the above estimates regard has been had to (1) sample returns of the number of special ration books issued to expectant mothers by the Ministry of Food, and (2) the recent trend of registered live births. The sample comprises some 200 Food Office areas containing about 25 per cent. of the population.

ENGLAND AND WALES

Monthly Statement of Deaths from Smallpox

There were no deaths from Smallpox registered in England and Wales during the month of March last.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 7th May, 1949, with totals from the first week of the year to date. } **London.**

(see General notes on page 2)

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
MAY, 1949.				
Sunday 1	12.9	14.8	Cloudless or little cloud.
Monday 2	8.8	14.9	Little cloud until 10½h., nearly overcast by 11h. Partially cloudy period 14h. until 16½h., overcast from 20h. Fresh wind 13h. until 22h.
Tuesday 3	9.0	14.9	Overcast until 9h., little cloud by 10h. Clouding over rapidly at 22h. Fresh wind 7h. until 16h.
Wednesday 4	3.0	15.0	Overcast until 12h. soon becoming nearly cloudless, but sky hazy. Mist in morning.
Thursday 5	3.3	15.0	Little cloud until 1h. overcast by 1½h. Nearly overcast 12h. until 16h., partially cloudy until 19h. then cloudless. Rain 7½h. until 9½h.
Friday 6	6.0	15.1	Generally cloudy until 20½h., cloudless until 23h. soon becoming overcast. Solar halo 12h.
Saturday 7	3.3	15.2	Overcast generally until 13h., cloudy until 19h.; then nearly cloudless. Rain at times 4½h. until 9h.
		Sum 46.3	Sum 104.9	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "*higher*" and — "*lower*" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading on the barometer increased from 30.31 ins. at the beginning of the week to 30.39 ins. by 8h. on May 1; decreased to 29.31 ins. by 6h. on May 5; increased and was 30.19 ins. by midnight on May 7.

1949 No. 19

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS,
INFECTIOUS DISEASES,
WEATHER REPORT

WEEK ENDED

SATURDAY, 14th MAY, 1949

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) is supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946. i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical)

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 14th May, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 14th May, 1949.

England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the “Others” column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	D	E	F	G	H	I	J	L	M	N	O	P	R	S
	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute poliioencephalitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

TABLE VI.—continued.

DATE.	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
MAY, 1949.			
Sunday	8	15.2	Little cloud until 14½h. soon becoming overcast. Hoar frost in morning.
Monday	9	15.3	Overcast until 5h., cloudy generally until 19h., cloudless by 20h.
Tuesday	10	15.3	Cloudless or nearly so. Hoar frost in morning.
Wednesday ..	11	15.4	Cloudless until 1h., generally cloudy until 22h. then overcast.
Thursday	12	15.4	Overcast until 11½h., cloudy until 14½h., few clouds until 22½h. then overcast.
Friday	13	15.5	Overcast until 10h., little cloud by 10½h., clouding over 22½h. Mist in evening. Fog from 23½h.
Saturday	14	15.6	Overcast till 8½h., thin cloud until 10h., very cloudy until 17h., then overcast. Fog until 9h., then slight mist or haze.
No. of Column	25	26	
Sum 50.1	Sum 107.7		

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean readings of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer increased from 30.19 ins. at the beginning of the week to 30.23 ins. by 7½h. on May 8; decreased to 30.12 ins. by 19h. on May 8; increased to 30.37 ins. by 10½h. on May 10; decreased and was 29.59 ins. by midnight on May 14.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 21st MAY, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE
1949

Sixpence net

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.

Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 21st May, 1949, with totals from the first week of the year to date. } London.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
Sunday 15	7.2	15.6	Overcast until 8½h., few clouds by 9h. Clouding 15½h. nearly overcast by 16½h. Slight rain 0½h. until 1½h., and rain 6½h. until 7½h. Slight mist or haze.
Monday 16	4.0	15.7	Overcast generally. and about midnight. Rain 19½h. until 21½h.
Tuesday 17	5.3	15.7	Overcast until 9h., cloudy until 21h. then overcast. Rain until 0½h. and showery 8h. until 9½h.
Wednesday 18	4.5	15.7	Nearly overcast until 18h., little cloud by 18½h. Slight showers at times 10½h. until 13h.
Thursday 19	2.9	15.8	Little cloud until 4h. then generally cloudy. Dew in morning.
Friday 20	1.5	15.8	Generally cloudy until 23½h. then clearing. Dew and mist in morning. Mist at night.
Saturday 21	9.4	15.9	Cloudless or nearly so. Partially cloudy period 11h. until 18h. Mist in morning.
No. of Column		25	26	
		Sum 34.8	Sum 110.2	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 29.59 ins. at the beginning of the week to 29.32 ins. by 3½h. on May 17; increased to 30.02 ins by 8½h. on May 21; decreased and was 29.95 ins. by midnight on the same day.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 28th May, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in England and Wales, Administrative Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	D	E	F	G	H	I	J	L	M	N	O	P	R	S
						Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute poliomyelitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

TABLE VI.—continued.

DATE.	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
Sunday 22	11.5	15.9	Cloudless until 10½h., cloudy until 17½h. then overcast. Rain 22½h. until 23½h.
Monday 23	2.1	16.0	Overcast, except for cloudy period until 14h. Solar halo 11½h. Rain at 5h. and about 21h.
Tuesday 24	2.8	16.0	Overcast until 10h. then generally cloudy. Rain 1½h. until 7½h., and showery 9h. until 11½h.
Wednesday .. 25	4.9	16.1	Generally cloudy until 19h. then overcast. Solar halo 15½h. until 16½h. Slight rain from 23h.
Thursday 26	0.5	16.1	Overcast until 16h., cloudy until 20½h., little cloud until 23½h., cloudy by 24h. Frequent rain until 11h.
Friday 27	1.3	16.1	Cloudy until 2h. then overcast. Fresh wind from 9h.
Saturday 28	2.7	16.2	Overcast until 12½h., cloudy until 21h., nearly cloudless by 21½h. Rain generally 3h. until 12½h. Fresh wind until 8h.
No. of Column		25	26
		Sum 25.8	Sum 112.4

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 29.94 ins. at the beginning of the week to 29.26 ins. by 7½h. on May 24; increased to 29.79 ins. by 0½h. on May 27; decreased to 29.47 ins. by 6½h. on May 28; increased and was 29.61 ins. by midnight on the same day.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS,
INFECTIOUS DISEASES,
WEATHER REPORT

WEEK ENDED

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical)

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

MONTHLY STATEMENT OF DEATHS FROM SMALLPOX IN ENGLAND AND WALES

Smallpox was mentioned as a cause of death in five entries during the month of April last. These deaths, one of which occurred in Doncaster C.B. (reported in Weekly Return for week ended 16th April, 1949), three in Guildford R.D. and one in Liskeard U.D. have been provisionally classified to Smallpox.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

** Return not received.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 4th June, 1949, with totals from the first week of the year to date. } London.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
MAY, 1949.				
Sunday 29	7.8	16.2	Nearly cloudless until 5h., cloudy until 12h., partially cloudy until 15h. then nearly cloudless. Shower 11½h.
Monday 30	11.3	16.2	Little cloud until 9h., cloudy until 15h. then few clouds. Showery 9½h. until 12½h.
Tuesday 31	12.5	16.3	Nearly cloudless until 7½h., cloudy or partially so until 23½h. then overcast.
June Wednesday 1	2.8	16.3	Overcast until 15h., partially cloudy by 16h. Cloudless from 20h. Rain 8½h. until 11h. and at 13h.
Thursday 2	11.2	16.3	Cloudless until 7½h., partially cloudy until 15½h. then few clouds.
Friday 3	0.2	16.4	Rapidly becoming overcast at 0½h. Partially cloudy from 19h. Slight rain at times 4h. until 9½h. and rain 10h. until 13h. Shower 17½h.
Saturday 4	10.0	16.4	Partially cloudy until 4h., overcast until 9h., cloudy until 16h. then few clouds. Rain 4½h. until 6h. Shower 11½h.
		Sum 55.8	Sum 114.1	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brilliant* sunshine on each day.

The reading of the barometer increased from 29.61 ins. at the beginning of the week to 29.64 ins. by 23h. on May 30; decreased to 29.55 ins. by 4½h. on June 1; increased to 29.75 ins. by 22h. on June 2; decreased to 29.44 ins. by 19h. on June 3; increased and was 29.78 ins. by midnight on June 4.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notification are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 11th June, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

CAUSES OF DEATH		Deaths registered from 1st week of the year.	Deaths registered during current week.											
		1949.	ALL AGES.	Under 1 year.	1-2 years.	2-5 years.	5-15 years.	15-25 years.	25-35 years.	35-45 years.	45-55 years.	55-65 years.	65-75 years.	75 years and upwards.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 11th June, 1949.

England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	D	E	F	G	H	I	J	L	M	N	C	O	P	R	S
						Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute polioencephalitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.		Sun above Horizon in hours.		GENERAL REMARKS.
June						
Sunday 5	11.1	16.4	Few clouds until 8 h., cloudy by 9h. Nearly cloudless from 19h.		
Monday 6	14.7	16.5	Nearly cloudless throughout.		
Tuesday 7	5.4	16.5	Nearly cloudless until 1h., generally cloudy until 17h., nearly cloudless by 18h. Slight rain 10½h. Solar halo 15h.		
Wednesday 8	0.6	16.5	Nearly cloudless until 0½h., overcast by 1h. Few clouds period 20h. until 23h.		
Thursday 9	0.0	16.5	Overcast or nearly so. Mist in morning.		
Friday 10	3.6	16.5	Overcast or nearly so. Slight showers 15h. and 15½h.		
Saturday 11	3.9	16.6	Overcast or nearly so until 15½h., slowly clearing to nearly cloudless by 20h.		
		Sum	Sum			
		39.3	115.5			
No. of Column		25	26			

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer increased from 29.78 ins. at the beginning of the week to 29.98 ins. by 0h. on June 6; decreased to 29.64 ins. by 10½h. on June 7; increased and was 30.01 ins. by midnight on June 11.

GENERAL NOTES

1. Introduction.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. Definitions of areas.—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

CORRIGENDA

Weekly return No. 23.

Week ended 11th June, 1949.

Table I.

Totals from 1st week of year in Great Towns.
1948.

Ac. Poliomyelitis and Polioencephalitis : Cases For 16 read 316.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

1948.

ac. Poliomyelitis and Polioencephalitis : Cases For 16 read 316.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Apr. 9	Apr. 16	Apr. 23	Apr. 30	May 7	May 14	May 21	May 28	June 4	June 11	June 18	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 18th June, 1949, with totals from the first week of the year to date. } **London.**

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 18th June, 1949.

England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	D	E	F	G	H	I	J	L	M	N	O	P	R	S
						Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute poliomyelitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

TABLE VI.—continued.

DATE.	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
Sunday 12	12.0	16.6	Few clouds until 18h. then very cloudy.
Monday 13	0.2	16.6	Overcast or nearly so. Occasional slight rain from 22½h.
Tuesday 14	3.3	16.6	Overcast until 11½h. then cloudy. Cloudless from 22½h. Rain 1h.—3½h. Slight mist 3h.—9h.
Wednesday 15	5.6	16.6	Little cloud until 2h.. overcast by 2½h., clearing 16½h. to nearly cloudless by 17½h., clouding 23½h. Few clouds period 7h.—10h. Mist 3h.—6h.
Thursday 16	6.3	16.6	Nearly overcast until 2½h. then cloudy. Few clouds 3½h.—9½h. then very cloudy. Slight mist 3h.—7h.
Friday 17	3.0	16.6	Overcast, clearing 15½h. to few clouds by 16h. Slight mist or haze from 4h.
Saturday 18	14.1	16.6	Few clouds, clouding 23½h. to very cloudy by midnight. Slight mist 4h.—7h.
No. of Column	25	Sum 116.2	Sum 26

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh*t sunshine on each day.

The reading of the barometer increased from 30.01 ins. at the beginning of the week to 30.15 ins. by 23½h. on June 12; decreased to 30.07 ins. by 15½h. on June 14; increased to 30.14 ins. by 7½h. on June 15; decreased to 30.06 ins. by 19½h. on June 15; increased to 30.16 ins. by 12½h. on June 17; decreased to 30.05 ins. by 18½h. on June 18; increased and was 30.07 ins. by midnight on the same day.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 25th JUNE, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

GENERAL NOTES

1. Introduction.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. Definitions of areas.—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—about the third week in each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 25th June, 1949, with totals from the first week of the year to date. } London.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

**TABLE IV.—Notification of Infectious Diseases in
the week ended 25th June, 1949.**

England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

*Note:—*Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
June	June			
Sunday	19	3.6	16.6	Overcast until 14h. then generally cloudy.
Monday	20	8.6	16.6	Cloudy until 10h. then little cloud. Partially cloudy period 13½h. until 18½h.
Tuesday	21	14.5	16.6	Nearly cloudless throughout.
Wednesday	22	4.6	16.6	Becoming overcast by 1½h. Partially cloudy 14½h. until 16½h. then little cloud.
Thursday	23	11.9	16.6	Little cloud. Overcast and misty period 4h. until 7h.
Friday	24	11.1	16.6	Little cloud. Overcast period 2h. until 7½h. Mist 3h. until 6h.
Saturday	25	9.0	16.6	Little cloud until 10h., partially cloudy until 20h. then overcast. Slight haze and poor sky from 3h.
No. of Column		Sum 63.3	Sum 116.2	
		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh*t sunshine on each day.

The reading of the barometer increased from 30.07 ins. at the beginning of the week to 30.16 ins. by 8½h. on June 20; decreased to 29.91 ins. by 15h. on June 23; increased to 30.03 ins. by 8½h. on June 24; decreased to 29.86 ins. by 18h. on June 25; increased and was 29.90 ins. by midnight on the same day.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ENGLAND AND WALES

Monthly Statement of Deaths from Smallpox

There were no deaths from Smallpox registered in England and Wales during the month of May last.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 2nd July, 1949, with totals from the first week of the year to date. } **London.**

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
June				
Sunday 26	14.2	16.6	Little cloud. Slight haze and poor sky until 14h.
Monday 27	12.8	16.6	Few clouds generally. Mist 3½h.—6h. Solar halo 11½h.—12½h.
Tuesday 28	7.4	16.6	Little cloud until 3½h., cloudy until 18½h. then nearly cloudless.
Wednesday 29	1.5	16.6	Nearly cloudless until 2h., thin cloud until 11h. then overcast or nearly so. Mist 3h.—6h.
Thursday 30	4.6	16.6	Nearly overcast. Cloudy period 10½h. until 19½h.
July				
Friday 1	13.0	16.6	Nearly overcast until 5h., nearly cloudless by 5½h.
Saturday 2	8.4	16.6	Nearly cloudless until 1h., thin cloud until 16½h., cloudless from 17½h. Solar halo 10h. until 15½h.
		Sum 61.9	Sum 116.2	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brilliant* sunshine on each day.

The reading of the barometer increased from 29.90 ins. at the beginning of the week to 30.26 ins. by 21½h. on July 1; decreased and was 30.13 ins. by midnight on July 2.

GENERAL NOTES

1. Introduction.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. Definitions of areas.—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 9th July, 1949, with totals from the first week of the year to date. } **London.**

(see General notes on page 2)

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
July				
Sunday 3	15.2	16.5	Cloudless or nearly so.
Monday 4	12.7	16.5	Little cloud until 16h., cloudy until 20h. then nearly overcast. Rain 20½h. until 21½h. and 23½h. until 23½h. then clearing.
Tuesday 5	7.1	16.5	Nearly cloudless until 4½h.; cloudy by 5h. Nearly overcast from 21h.
Wednesday 6	0.5	16.5	Nearly overcast generally.
Thursday 7	0.0	16.4	Overcast generally until 20½h. then few clouds. Slight drizzle at times 6½h. until 12½h.
Friday 8	9.4	16.4	Little cloud, overcast period 2h. until 8½h.
Saturday 9	7.0	16.4	Variably cloudy until 5h. then nearly overcast. Few clouds from 13h.
		Sum 51.9	Sum 115.2	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 30.13 ins. at the beginning of the week to 29.84 ins. by 17½h. on July 4; increased and was 30.13 ins. by midnight on July 9.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ENGLAND AND WALES

BIRTHS AND DEATHS registered in the Quarter ended 30th June, 1949, with comparative figures for the second Quarters of three earlier years. (The customary analysis will appear in the Quarterly Return in due course).

SECOND QUARTER OF:—	LIVE BIRTHS.		STILLBIRTHS.		DEATHS (including non-civilians).		DEATHS of INFANTS under 1 year.	
	Number.	per 1,000 total population.	Number.	per 1,000 total live & stillbirths.	Number.	per 1,000 total population.	Number.	per 1,000 related live births.
1949	192,166	17·7	4,470	22·7	119,984	11·1	5,694	30
1948	203,593	18·8	4,746	22·8	110,257	10·2	6,357	31
1947	235,196	21·9	5,831	24·2	118,015	11·0	9,195	40
1938	164,179	16·0	6,639	38·9	119,188	11·6	8,006	50

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 16th July, 1949, with totals from the first week of the year to date. } London.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in England and Wales, Administrative Areas and Port Health Districts.
the week ended 16th July, 1949.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
July				
Sunday 10	12.3	16.4	Little cloud.
Monday 11	9.5	16.4	Few clouds generally. Fog 3h. until 8 th . Solar halo 13h. Parheliion 18h. 40m.
Tuesday 12	14.3	16.3	Cloudless or nearly so. Mist 3h. until 6h.
Wednesday 13	0.4	16.3	Few clouds until 3h., nearly overcast by 4h., clearing 2h. to little cloud by 2 ¹ / ₄ h. Mist 5h. until 8h. Rain 14h. Heavy shower 18h. Thunder 18h. until 19 ¹ / ₄ h.
Thursday 14	4.0	16.2	Little cloud until 5h. then generally cloudy. Rain 2 ¹ / ₄ h. and about 22h.
Friday 15	4.2	16.2	Cloudy until 13h. then nearly overcast. Mist 2 ¹ / ₄ h. until 5 ¹ / ₄ h.
Saturday 16	2.2	16.2	Nearly overcast until 13h., partially cloudy 13 ¹ / ₄ h. until 15h. then very cloudy. Thunder- storm with heavy rain 9 ¹ / ₄ h. until 10h. Thunder shower 18 ¹ / ₄ h.
		Sum 46.9	Sum 114.0	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brilliant* sunshine on each day.

The reading of the barometer increased from 30.13 ins. at the beginning of the week to 30.17 ins. by 0h. on July 11; decreased to 29.63 ins. by 11h. on July 13; increased to 29.76 ins. by 22h. on July 14; decreased to 29.57 ins. by 16h. on July 16; increased and was 29.63 by midnight on the same day.

1949

Sixpence net

GENERAL NOTES

1. Introduction.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. Definitions of areas.—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

POPULATION ESTIMATES

The Registrar General's latest estimates of populations will be found in "Estimates of the Populations of England and Wales: Civilian Populations of each Administrative Area at 30th June and 31st December, 1948." H.M.S.O. price 4d. net (or post free from P.O. Box 569, London, S.E. 1., price 5d.).

ESTIMATE OF BIRTHS: ENGLAND AND WALES

(a) Final estimate of live births to be expected in the quarter ending 30th September, 1949		184,000
(b) Provisional estimate of live births to be expected in the quarter ending 31st December, 1949		165,000

In the above estimates regard has been had to (1) sample returns of the number of special ration books issued to expectant mothers by the Ministry of Food, and (2) the recent trend of registered live births. The sample comprises some 200 Food Office areas containing about 25 per cent. of the population.

In view of recent changes in rationing arrangements, which may affect the timing of the applications by expectant mothers for special ration books, the second figure given above should be regarded with special caution.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	May 14	May 21	May 28	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 23rd July, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1949.	Deaths registered during current week.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Cause of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in England and Wales, Administrative Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	D	E	F	G	H	I	J	L	M	N C	O	P	R	S
						Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute polioencephalitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

TABLE VI.—continued.

DATE.	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
July			
Sunday .. 17	3.3	16.1	Very cloudy until 15h. then overcast. Heavy shower 11h., and thundery shower 15½h.
Monday .. 18	0.1	16.1	Overcast or nearly so. Slight mist in morning.
Tuesday .. 19	6.3	16.1	Overcast until 14h., cloudy until 21½h., then few clouds. Slight mist in morning.
Wednesday .. 20	6.7	16.0	Little cloud until 10h., thin cloud until 11½h., overcast from 13½h. Dew and slight mist in morning. Solar halo 10½h. until 11½h.
Thursday .. 21	7.1	16.0	Overcast until 6½h., cloudy until 15h., little cloud until 23h., overcast by 0h.
Friday .. 22	5.4	15.9	Overcast until 3h. then very cloudy generally. Slight mist 4h. until 8h.
Saturday .. 23	6.5	15.9	Very cloudy generally until 18h., cloudless by 20h.
No. of Column	Sum 35.4	Sum 112.1	
	25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brilliant* sunshine on each day.

The reading of the barometer increased from 29.63 ins. at the beginning of the week to 30.06 ins. by 21½h. on July 19; decreased to 29.89 ins by 16h. on July 23; increased and was 29.92 ins. by midnight on the same day.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

POPULATION ESTIMATES

The Registrar General's latest estimates of populations will be found in "Estimates of the Populations of England and Wales: Civilian Populations of each Administrative Area at 30th June and 31st December, 1948." H.M.S.O. price 4d. net (or post free from P.O. Box 569, London, S.E. 1., price 5d.).

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	May 21	May 28	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 30th July, 1949, with totals from the first week of the year to date. } London.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 30th July, 1949. } Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	Cholera.	A	B	D	E	F	G	H	I	J	L	M	N	C	O	P	R	S

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
July				
Sunday 24	12.0	15.8	Cloudless or nearly so. Hazy sky in after-noon.
Monday 25	6.3	15.8	Cloudless until 1h., very cloudy by 1½h. Clearing 22h., cloudless from 22½h.
Tuesday 26	11 4	15.7	Nearly cloudless until 11h., partially cloudy until 21h., little cloud by 22h.
Wednesday 27	4 5	15.7	Little cloud until 4h., very cloudy until 22h. then few clouds. Slight rain 11½h.
Thursday 28	11.6	15.6	Few clouds or partially cloudy until 13h., cloudy until 17½h. then nearly overcast.
Friday 29	8 0	15.6	Nearly overcast until 11h., partially cloudy until 19h. then little cloud.
Saturday 30	6.5	15.6	Few clouds until 9h. then very cloudy.
No. of Column		Sum 60 3	Sum 109.8	
		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brilliant* sunshine on each day.

The reading of the barometer increased from 29.92 ins. at the beginning of the week to 29.96 ins. by 23½h. on July 24; decreased to 29.83 ins. by 17½h. on July 27; increased to 30.00 ins. by 7½h. on July 30; decreased and was 29.87 ins. by midnight on the same day.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

POPULATION ESTIMATES

The Registrar General's latest estimates of populations will be found in "Estimates of the Populations of England and Wales: Civilian Populations of each Administrative Area at 30th June and 31st December, 1948." H.M.S.O. price 4d. net (or post free from P.O. Box 569, London, S.E. 1., price 5d.).

ENGLAND AND WALES

Monthly Statement of Deaths from Smallpox

There were no deaths from Smallpox registered in England and Wales during the month of June last.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	May 28	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug. 6	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 6th August, 1949, with totals from the first week of the year to date. } London.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
Sunday	31 July	0.7	15.5	Very cloudy until 7h., overcast until 21h., then generally cloudy. Slight rain 1h. until 1½h. Frequent rain 7h. until 18h.
Monday	1 August	0.6	15.4	Overcast or nearly so. Rain 2¼h. until 23½h.
Tuesday	2	5.8	15.4	Overcast until 6h., then very cloudy. Rain or heavy rain 3h. until 7h., showery 9½h. until 16½h. Fresh wind 11h. until 19h.
Wednesday	3	7.7	15.3	Overcast until 7½h. Generally cloudy until 18½h. then few clouds. Fresh wind 2h. until 19h.
Thursday	4	13.1	15.3	Little cloud; partially cloudy period 6½h. until 17h.
Friday	5	13.6	15.2	Little cloud.
Saturday	6	5.3	15.2	Few clouds until 3½h., overcast until 10h., partially cloudy until 2¼h. then few clouds. Solar halo 16½h. until 17h.
No. of Column		Sum 46.8	Sum 107.3	
		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh*t sunshine on each day.

The reading of the barometer decreased from 29.87 ins. at the beginning of the week to 29.09 ins. by 18h. on August 2; increased to 29.91 ins. by 11½h. on August 4; decreased to 29.71 ins. by 4h. on August 6; increased and was 29.89 ins. by midnight on the same day.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical)

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published *on this page* as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

POPULATION ESTIMATES

The Registrar General's latest estimates of populations will be found in "Estimates of the Populations of England and Wales: Civilian Populations of each Administrative Area at 30th June and 31st December, 1948." H.M.S.O. price 4d. net (or post free from P.O. Box 569, London, S.E. 1., price 5d.).

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 13th August, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1949.	Deaths registered during current week.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 13th August, 1949.

England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenza).	A	B	D	E	F	G	H	I	J	L	M	N	O	P	R	S
						Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute poli-encephalitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

TABLE VI.—continued.

DATE.	August		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
Sunday	7	1.9	15.1		Few clouds until 5h., thin cloud until 11h., then overcast. Solar halo 8h. until 11h. Rain about 20½h. Fresh wind from 22h.
Monday	8	11.0	15.1		Overcast until 3h., few clouds until 13h., cloudy until 23½h. then little cloud. Fresh wind until 3h.
Tuesday	9	10.4	15.0		Few clouds until 8½h., generally cloudy until 18h. then little cloud.
Wednesday ..	10	7.8	14.9		Little cloud until 8½h., cloudy until 14½h. then overcast. Solar halo 14½h until 15½h. Slight rain at times from 20½h.
Thursday	11	5.2	14.9		Overcast until 13½h., partially cloudy until 17h., few clouds until 20h. then cloudless. Frequent rain until 2½h. Fresh wind 9h. until 18h.
Friday	12	12.9	14.8		Little cloud.
Saturday	13	12.0	14.8		Cloudless generally. Thin cloud prevalent 10h. until 17h.
No. of Column		25	Sum 61.2	Sum 104.6	26

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 29.89 ins. at the beginning of the week to 29.46 ins. by 23½h. on August 7; increased to 30.17 ins. by 12½h. on August 10; decreased to 29.92 ins. by 5½h. on August 11; increased to 30.40 ins. by 9½h. on August 12; decreased and was 30.22 ins. by midnight on August 13.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 20th AUGUST, 1949

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those *registered* in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

POPULATION ESTIMATES

The Registrar General's latest estimates of populations will be found in "Estimates of the Populations of England and Wales: Civilian Populations of each Administrative Area at 30th June and 31st December, 1948." H.M.S.O. price 4d. net (or post free from P.O. Box 569, London, S.E. 1., price 5d.).

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note.—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 20th August, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1949.	Deaths registered during current week.											
			ALL AGES.	Under 1 year.	1-2 years.	2-5 years.	5-15 years.	15-25 years.	25-35 years.	35-45 years.	45-55 years.	55-65 years.	65-75 years.	75 years and upwards.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 20th August, 1949.England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A Cholera.	B Plague.	D Cerebro-spinal fever.	E Acute poliomyelitis.	F Acute polioencephalitis.	G Acute encephalitis lethargica.	H Typhus fever.	I Relapsing fever.	J Continued fever. (London only).	L Dysentery.	M Ophthalmia neonatorum.	N Puerperal pyrexia and Puerperal fever.	O Smallpox.	P Paratyphoid.	R Typhoid.	S Food poisoning.

TABLE VI.—continued.

	DATE.	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
Sunday 14	13.0	14.7	Cloudless until 7h. then few thin clouds.
Monday 15	13.3	14.7	Few thin clouds until 12h. then cloudless. Slight mist in morning.
Tuesday 16	5.2	14.6	Little cloud until 3½h., thin cloud until 10½h. then overcast. Clearing 19½h., little cloud by 20½h. Clouding over at midnight.
Wednesday 17	6.3	14.6	Overcast until 7h., thin cloud until 10½h., few clouds until 12½h., cloudy until 17h. then overcast. Solar halo 8h. until 10½h.
Thursday 18	0.3	14.5	Overcast or nearly so until 20½h., nearly cloudless by 21h.
Friday 19	8.1	14.4	Nearly cloudless until 11½h., cloudy until 14h. then nearly overcast. Mist in morning.
Saturday 20	5.0	14.4	Little cloud until 3½h., nearly overcast until 8½h., cloudy until 14½h. then thin cloud prevalent.
No. of Column		25	26	
		Sum 52.1	Sum 101.9	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 30.22 ins. at the beginning of the week to 29.95 ins. by 3½h. on August 16; increased to 30.15 ins. by 9½h. on August 17; decreased and was 30.05 ins. by midnight on August 20.

1949 No. 34

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 27th AUGUST, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter:

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ENGLAND AND WALES

Monthly Statement of Deaths from Smallpox

There were no deaths from Smallpox registered in England and Wales during the month of July last.

ACUTE POLIOMYELITIS AND POLIOENCEPHALITIS

The following table shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29
Year: 1949	13	19	38	52	81	77	117	99	169	187	254	295	280									
1948	22	14	15	31	38	25	38	45	39	43	39	78	77	73	76	74	73	88	86	88	80	70
1947	21	24	34	46	67	88	126	193	336	487	624	691	676	657	708	614	594	473	429	364	288	280

* Not corrected for revision of diagnosis.

TABLE 1.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug. 6	Aug. 13	Aug. 20	Aug. 27	Totals from 1st Week of year, in Great Towns ONLY

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 27th August, 1949, with totals from the first week of the year to date. } London.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 27th August, 1949.

England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenza).	A	B	D	E	F	G	H	I	J	L	M	N	O	P	R	S
						Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute poliomyelitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
August				
Sunday 21	11.6	14.3	Thin cloud until 9h. then nearly cloudless.
Monday 22	6.5	14.3	Little cloud. Very cloudy period 13½h. until 19h. Dew and mist in morning.
Tuesday 23	0 8	14.2	Little cloud until 3½h., overcast by 4h. Mist in morning. Rain at times 7½h. until 11½h.
Wednesday 24	2.6	14.1	Overcast generally. Few clouds period 12½h. until 16h. Rain about 6h. Mist 4h. until 11h.
Thursday 25	0.5	14.0	Overcast until 14h., little cloud by 16h. Mist in morning.
Friday 26	0.0	14.0	Overcast by 0½h. Sky veiled from 14h. Mist 4h. until 8½h. then slight mist.
Saturday 27	4.3	13.9	Sky veiled until 3h., overcast until 11h., cloudless 12h. until 18½h., then overcast. Slight mist or haze. Wet fog 4h. until 8½h.
No. of Column		Sum 26.3	Sum 98.8	
		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher," and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 30.05 ins. at the beginning of the week to 29.89 ins. by 6h. on August 23; increased to 29.98 ins. by 9½h. on August 24; decreased to 29.83 ins. by 17½h. on August 26; increased and was 29.98 ins. by midnight on August 27.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ACUTE POLIOMYELITIS AND POLIOENCEPHALITIS

The following table shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29
Year: 1949	13	19	38	52	81	77	117	99	169	187	254	296	280	308								
1948	22	14	15	31	38	25	38	45	39	43	39	78	77	73	76	74	73	88	86	88	80	70
1947	21	24	34	46	67	88	126	193	336	487	624	691	676	657	708	614	594	473	429	364	288	280

* Not corrected for revision of diagnosis.

POPULATION ESTIMATES

The Registrar General's latest estimates of populations will be found in "Estimates of the Populations of England and Wales: Civilian Populations of each Administrative Area at 30th June and 31st December, 1948." H.M.S.O. price 4d. net (or post free from P.O. Box 569, London, S.E.1, price 5d.). "Estimates of the sex and age Distribution of the Civilian Population in Regions and Administrative Areas of England and Wales at 31st December, 1947," will be published shortly.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 3rd September, 1949, with totals from the first week of the year to date. } **London.**

(see General notes on page 2)

Sunday 28	5.0	13.9	Overcast until 4h., sky veiled until 8½h. then few clouds. Very cloudy 13h. until 21h. then overcast. Mist 4h. until 8h.
Monday 29	3.3	13.8	Overcast until 9¼h. then very cloudy. Mist 4h. until 9½h.
Tuesday 30	6.7	13.7	Very cloudy until 5½h., partially cloudy until 13½h., then nearly overcast. Solar halo 15h. until 16h. Slight rain 22½h.
Wednesday 31	8.0	13.7	Nearly overcast until 2h., little cloud until 10h., very cloudy until 20h. then overcast. Thunderstorm with heavy rain 20h. until 20½h. Rain 21½h.
Thursday 1	5.0	13.6	Overcast until 10h., generally cloudy until 23h. then clearing. Slight rain 7½h. until 9½h. Mist 4h. until 8½h.
Friday 2	9.3	13.5	Few clouds until 14h., cloudy until 16½h., nearly overcast until 22½h. then cloudy.
Saturday 3	6.2	13.5	Cloudy generally until 22h., cloudless by 22½h.
No. of Column		Sum 43.5	Sum 95.7	
		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh*t sunshine on each day.

The reading of the barometer increased from 29.98 ins. at the beginning of the week to 30.08 ins. by 21½h. on August 28; decreased to 29.59 ins. by 5½h. on September 1; increased and was 29.81 ins. by midnight on September 3.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ACUTE POLIOMYELITIS AND POLIOENCEPHALITIS

The following table shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29
Year: 1949	13	19	38	52	81	77	117	99	169	187	254	296	280	308	306							
1948	22	14	15	31	38	25	38	45	39	43	39	78	77	73	76	74	73	88	86	88	80	70
1947	21	24	34	46	67	88	126	193	336	487	624	691	676	657	708	614	594	473	429	364	288	280

* Not corrected for revision of diagnosis.

POPULATION ESTIMATES

The Registrar General's latest estimates of populations will be found in "Estimates of the Populations of England and Wales: Civilian Populations of each Administrative Area at 30th June and 31st December, 1948." H.M.S.O. price 4d. net (or post free from P.O. Box 569, London, S.E.1, price 5d.). "Estimates of the sex and age Distribution of the Civilian Population in Regions and Administrative Areas of England and Wales at 31st December, 1947." will be published shortly.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Notes:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	July 2	July 9	July 16	July 23	July 30	Aug. 6	Aug. 13	Aug. 20	Aug. 27	Sept. 3	Sept. 10	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 10th September, 1949, with totals from the first week of the year to date. } London.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 10th September, 1949.

England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the “Others” column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	D	E	F	G	H	I	J	L	M	N	O	P	R	S
						Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute polioencephalitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
September				
Sunday 4	10.1	13.4	Cloudless until 10½h., then few clouds.
Monday 5	8.4	13.3	Few clouds generally until 21½h., cloudy by 22h. Slight shower 9.05h.
Tuesday 6	8.4	13.3	Very cloudy until 6h., partially cloudy until 19½h., then little cloud.
Wednesday 7	7.4	13.2	Little cloud until 3½h., cloudy until 15½h., then few clouds.
Thursday 8	6.2	13.2	Few clouds until 10h., then cloudy or very cloudy.
Friday 9	2.9	13.1	Generally cloudy until 18h., partially cloudy, until 22h., then few clouds. Solar halo 10h.
Saturday 10	9.2	13.0	Few clouds until 4½h., cloudy by 5h. Few clouds 10½h. until 18h., then cloudless. Dew and slight mist in morning.
		Sum 52.6	Sum 92.5	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer increased from 29.81 ins. at the beginning of the week to 29.81 ins. by 8½h. on September 4; decreased by 29.68 ins. by 6½h. on September 5; increased to 30.12 ins. by 1½h. on September 8; decreased by 29.91 ins. by 17h. on September 10; increased and was 29.97 ins. by midnight on the same day.

1949 No. 37

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 17th SEPTEMBER, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ACUTE POLIOMYELITIS AND POLIOENCEPHALITIS

The following table shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29
Year: 1949	13	19	38	52	81	77	117	99	169	187	254	296	280	308	306	342						
1948	22	14	15	31	38	25	38	45	39	43	39	78	77	73	76	74	73	88	86	88	80	70
1947	21	24	34	46	67	88	126	193	336	487	624	691	676	657	708	614	594	473	429	364	288	280

* Not corrected for revision of diagnosis.

POPULATION ESTIMATES

The Registrar General's latest estimates of populations will be found in "Estimates of the Populations of England and Wales: Civilian Populations of each Administrative Area at 30th June and 31st December, 1948." H.M.S.O. price 4d. net (or post free from P.O. Box 569, London, S.E.1, price 5d.). "Estimates of the sex and age Distribution of the Civilian Population in Regions and Administrative Areas of England and Wales at 31st December, 1947." will be published shortly.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Notes:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 17th September, 1949, with totals from the first week of the year to date. } **London.**

(see General notes on page 2)

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Cause of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 17th September, 1949.England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A Cholera.	B Plague.	D Cerebro-spinal fever.	E Acute poliomyelitis.	F Acute polioencephalitis.	G Acute encephalitis lethargica.	H Typhus fever.	I Relapsing fever.	J Continued fever. (London only).	L Dysentery.	M Ophthalmia neonatorum.	N Puerperal pyrexia and Puerperal fever.	O Smallpox.	P Paratyphoid.	R Typhoid.	S Food poisoning.

TABLE VI.—continued.

DATE.	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
September			
Sunday 11	7.4	12.9	Cloudless until 4h., overcast by 5h. Partially cloudy 9h. until 12h. then little cloud. Mist and dew in morning.
Monday 12	7.3	12.9	Becoming overcast by 1h. Thin cloud 8h. until 12h. then little cloud. Clouding over 22h. Solar halo 8h. until 11½h.
Tuesday 13	6.4	12.8	Overcast until 9h., partially cloudy until 16h., overcast by 17h. Fresh wind 9h. until 20h.
Wednesday .. 14	0.0	12.8	Overcast. Rain or slight rain 6h. until 12½h.
Thursday 15	1.9	12.7	Overcast until 6h., very cloudy until 21½h. cloudless by 22½h. Rain or heavy rain 4½h. until 5½h. and about 17½h.
Friday 16	6.9	12.7	Few clouds, cloudy period 10½h. until 18h.
Saturday 17	7.0	12.6	Little cloud until 1½h., generally cloudy until 19½h., cloudless by 20½h.
No. of Column	Sum 36.9	Sum 89.4	
	25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer increased from 29.97 ins. at the beginning of the week to 30.07 ins. by 22½h. on September 11; decreased to 29.46 ins. by 9½h. on September 14; increased to 29.57 ins. by 22½h. on September 14; decreased to 29.50 ins. by 9½h. on September 15; increased and was 29.93 ins. by midnight on September 17.

1949 No. 38

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 24th SEPTEMBER, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ACUTE POLIOMYELITIS AND POLIOENCEPHALITIS

The following table shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct 1	Oct 8	Oct 15	Oct 22	Oct 29
Year: 1949	13	19	38	52	81	77	117	99	169	187	254	296	280	308	306	343	295					
1948	22	14	15	31	38	25	38	45	39	43	39	78	77	73	76	74	73	88	86	88	80	70
1947	21	24	34	46	67	88	126	193	336	487	624	691	676	657	708	614	594	473	429	364	288	280

* Not corrected for revision of diagnosis.

POPULATION ESTIMATES

The Registrar General's latest estimates of populations will be found in "Estimates of the Populations of England and Wales: Civilian Populations of each Administrative Area at 30th June and 31st December, 1948." H.M.S.O. price 4d. net (or post free from P.O. Box 569, London, S.E.1, price 5d.). "Estimates of the sex and age Distribution of the Civilian Population in Regions and Administrative Areas of England and Wales at 31st December, 1947," will be published shortly.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 24th September, 1949, with totals from the first week of the year to date. } **London.**

(see General notes on page 2)

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1949	Deaths registered during current week.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 24th September, 1949.

England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A Cholera.	B Plague.	D Cerebro-spinal fever.	E Acute poliomyelitis.	F Acute poliomyelitis.	G Acute encephalitis lethargica.	H Typhus fever.	I Relapsing fever.	J Continued fever. (London only).	L Dysentery.	M Ophthalmia neonatorum.	N Puerperal pyrexia and Puerperal fever.	O Smallpox.	P Paratyphoid.	R Typhoid.	S Food poisoning.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
September				
Sunday 18	0.9	12.5	Cloudless until 4½h., cloudy by 5h. Nearly overcast 12h. until 18½h. Little cloud by 19½h. Dew and mist in morning. Solar halo 9h.—11h.
Monday 19	3.9	12.4	Little cloud until 4h., cloudy until 18h., then overcast. Dew and mist in morning.
Tuesday 20	4.6	12.4	Overcast until 2h., partially cloudy until 21½h., then overcast. Fog 4h. until 7h.
Wednesday 21	0.0	12.3	Overcast. Rain or slight rain 7½h.—18½h. Misty from 5h.
Thursday 22	2.2	12.3	Overcast or nearly so. Rain 0½h.—2½h. and at 21h. Misty until 11h. Slight mist from 15h.
Friday 23	0.2	12.2	Overcast generally. Slight mist. Rain from 23½h.
Saturday 24	1.2	12.1	Very cloudy until 23h. then cloudless. Intermittent rain until 8½h. Slight mist until 10h.
		Sum 13.0	Sum 86.2	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh*t sunshine on each day.

The reading of the barometer increased from 29.93 ins. at the beginning of the week to 29.97 ins. by 10½h. on September 19; decreased to 29.66 ins. by 21½h. on September 22; increased to 29.74 ins. by 12h. on September 23; decreased to 29.61 ins. by 6h. on September 24; increased and was 29.67 ins. by midnight on the same day.

1949 No. 39

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER REPORT

WEEK ENDED

SATURDAY, 1st OCTOBER, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"—administrative county of London: "Great Towns"—London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"—aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical)

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ENGLAND AND WALES

Monthly Statement of Deaths from Smallpox

There were no deaths from Smallpox registered in England and Wales during the month of August last.

ACUTE POLIOMYELITIS AND POLIOENCEPHALITIS

The following table shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29
Year: 1949	13	19	38	52	81	77	117	99	169	187	254	296	280	308	306	343	300	357				
1948	22	14	15	31	38	25	38	45	39	43	39	78	77	73	76	74	73	88	86	88	80	70
1947	21	24	34	46	67	88	126	193	336	487	624	691	676	657	708	614	594	473	429	364	288	280

* Not corrected for revision of diagnosis.

POPULATION ESTIMATES

The Registrar General's latest estimates of populations will be found in "Estimates of the Populations of England and Wales: Civilian Populations of each Administrative Area at 30th June and 31st December, 1948." H.M.S.O. price 4d. net (or post free from P.O. Box 569, London, S.E.1, price 5d.). "Estimates of the sex and age Distribution of the Civilian Population in Regions and Administrative Areas of England and Wales at 31st December, 1947." H.M.S.O. price 2s. 6d. net (or post free 2s. 8d.).

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 1st October, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in England and Wales, Administrative Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

TABLE VI.—continued.

DATE.	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
September			
Sunday 25	8.0	12.1	Cloudless generally until 7½h. then partially cloudy. Nearly cloudless from 17h.
Monday 26	0.8	12.0	Cloudless until 2h., overcast generally from 2½h., clearing 18h. to little cloud by 18½h., clouding 23½h. Rain 11½h.—12½h. Fog in morning.
Tuesday 27	3.5	11.9	Overcast generally until 13h., nearly cloudless by 13½ until 22½h. Cloudy from 23h.
Wednesday .. 28	3.7	11.9	Nearly overcast generally. Partially cloudy period 13h.—17h. Slight mist throughout. Dew in morning.
Thursday 29	2.0	11.8	Overcast. Few clouds period 13h.—18h. Misty.
Friday 30	0.3	11.7	Overcast or nearly so. Slight mist.
October			
Saturday 1	4.2	11.7	Cloudy generally. Few clouds periods 8½h.—10h., 11½h.—12½h., and 18½h.—21½h.
No. of Column	Sum 22.5	Sum 83.1	
	25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brilliant* sunshine on each day.

The reading of the barometer increased from 29.67 ins. at the beginning of the week to 30.16 ins. by 9h. on September 27th; decreased to 29.92 ins. by 5½h. on September 30th; increased and was 30.00 ins. by midnight on October 1st.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ACUTE POLIOMYELITIS AND POLIOENCEPHALITIS

The following table shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29
Year: 1949	13	19	38	52	81	77	117	99	169	187	254	296	280	308	305	343	305	357	374			
1948	22	14	15	31	38	25	38	45	39	43	39	78	77	73	76	74	73	88	86	88	80	70
1947	21	24	34	46	67	88	126	193	336	487	624	691	676	657	708	614	594	473	429	364	288	280

* Not corrected for revision of diagnosis.

POPULATION ESTIMATES

The Registrar General's latest estimates of populations will be found in "Estimates of the Populations of England and Wales: Civilian Populations of each Administrative Area at 30th June and 31st December, 1948", H.M.S.O. price 4d. net or post free from P.O. Box 569, London, S.E.1, price 5d.) and in "Estimates of the sex and age Distribution of the Civilian Populations in Regions and Administrative Areas of England and Wales at 31st December, 1947", H.M.S.O. price 2s. 6d. net (or post free 2s. 8d.).

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	July 30	Aug. 6	Aug. 13	Aug. 20	Aug. 27	Sept. 3	Sept. 10	Sept. 17	Sept. 24	Oct. 1	Oct. 8	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 8th October, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

TABLE VI.—continued.

DATE		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
October				
Sunday	2	7.9	11.6	Overcast until 8h. Little cloud by 8½h. Mist at night.
Monday	3	4.9	11.5	Little cloud until 7h., cloudy until 10h., then few thin clouds. Mist in morning.
Tuesday	4	8.4	11.4	Few clouds. Cloudy periods 3h. until 6h. and 15h. until 17h. Mist in morning.
Wednesday	5	4.5	11.4	Sky veiled until 3h., overcast and wet fog until 10h. then few clouds. Cloudy 18h. until 21½h. then overcast.
Thursday	6	5.2	11.3	Overcast until 10½h. Little cloud by 11h. Cloudy period 16h. until 19½h. Mist or fog until 10h.
Friday	7	4.2	11.3	Few clouds until 2h. Cloudy until 14h. then nearly cloudless. Dew in morning. Mist from 22h.
Saturday	8	4.2	11.2	Nearly cloudless, mist until 3h., then overcast and wet fog until 10h. Few clouds until 15½h. Overcast by 16½h.
No. of Column		Sum 39.3	Sum 79.7	
		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

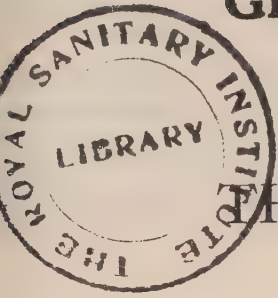

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brighi* sunshine on each day.

The reading of the barometer increased from 30.00 ins. at the beginning of the week to 30.20 ins. by 1½h. on October 4; decreased and was 29.63 ins. by midnight on October 8.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN

BIRTHS AND DEATHS,
INFECTIOUS DISEASES,
WEATHER REPORT

WEEK ENDED

SATURDAY, 15th OCTOBER, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ACUTE POLIOMYELITIS AND POLIOENCEPHALITIS

The following table shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29
Year: 1949	13	19	38	52	81	77	117	99	169	186	254	295	280	308	305	342	305	356	375	463		
1948	22	14	15	31	38	25	38	45	39	43	39	78	77	73	76	74	73	88	86	88	80	70
1947	21	24	34	46	67	88	126	193	336	487	624	691	676	657	708	614	594	473	429	364	288	280

* Not corrected for revision of diagnosis.

ENGLAND AND WALES

BIRTHS AND DEATHS registered in the Quarter ended 30th September, 1949, with comparative figures for the third Quarters of four earlier years. (The customary analysis will appear in the Quarterly Return in due course).

THIRD QUARTER OF:—	LIVE BIRTHS.		STILLBIRTHS.		DEATHS (including non-civilians).		DEATHS of INFANTS under 1 year.	
	Number.	per 1,000 total population.	Number.	per 1,000 total live & stillbirths.	Number.	per 1,000 total population.	Number.	per 1,000 related live births.
1949	183,278	16.7	4,104	21.9	101,207	9.2	4,883	26
1948	191,858	17.5	4,447	22.7	101,545	9.3	5,514	28
1947	216,508	20.0	5,073	22.9	97,099	8.9	7,141	32
1946	213,051	19.8	5,831	26.6	100,409	9.3	7,100	35
1938	158,082	15.2	6,072	37.0	102,545	9.9	6,629	42

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

Note:—The deaths are not comparable with the notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Aug. 6	Aug. 13	Aug. 20	Aug. 27	Sept. 3	Sept. 10	Sept 17	Sept. 24	Oct. 1	Oct. 8	Oct. 15	Totals from 1st Week of year, in Great Towns ONLY

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 15th October, 1949, with totals from the first week of the year to date. } London.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
October				
Sunday	.. 9	2.8	11.2	Overcast until 11h., cloudy until 15½h. Cloudless by 16h. Rain at times 1½h. until 9h.
Monday	.. 10	3.6	11.1	Cloudless until 2½h., cloudy generally until 18½h. then nearly overcast. Wet fog 6h. until 9h. Dew in morning.
Tuesday	.. 11	1.0	11.0	Overcast until 15½h., rapidly clearing to cloudless. Rain at times 8h. until 15½h. Heavy squally rain 14½h.
Wednesday	.. 12	8.7	11.0	Cloudless or nearly so. Partially cloudy period 11½h. until 16h.
Thursday	.. 13	1.7	10.9	Cloudless until 1½h. then overcast and wet fog. Fog until 9½h. generally, cloudy until 19½h. then cloudless. Dew at night.
Friday	.. 14	4.6	10.8	Cloudless until 2h., overcast 2½h. until 11½h., little cloud by 12h. Very cloudy from 16h. Dew in morning.
Saturday	.. 15	8.6	10.8	Very cloudy until 7h., few clouds until 18½h., cloudless until 21h., rapidly becoming overcast.
No. of Column		Sum 31.0	Sum 76.8	
		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *bright* sunshine on each day.

The reading of the barometer decreased from 29.63 ins. at the beginning of the week to 29.59 ins. by 4½h. on October 9; increased to 29.83 ins. by 21h. on October 10; decreased to 29.72 ins. by 15½h. on October 11; increased to 30.25 ins. by 9½h. on October 13; decreased and was 29.75 ins. by midnight on October 15.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

ACUTE POLIOMYELITIS AND POLIOENCEPHALITIS

The following table shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29
Year: 1949	13	19	38	52	81	77	117	99	169	186	254	295	280	308	305	342	305	355	375	463	414	
1948	22	14	15	31	38	25	38	45	39	43	39	78	77	73	76	74	73	88	86	88	80	70
1947	21	24	34	46	67	88	126	193	336	487	624	691	676	657	708	614	594	473	429	364	288	280

* Not corrected for revision of diagnosis.

POPULATION ESTIMATES

The Registrar General's latest estimates of populations will be found in "Estimates of the Population of England and Wales: Civilian Populations of each Administrative Area at 30th June and 31st December, 1948", H.M.S.O. price 4d. net (or post free from P.O. Box 569, London, S.E.1, price 5d.) and in "Estimates of the sex and age Distribution of the Civilian Population in Regions and Administrative Areas of England and Wales at 31st December, 1947", H.M.S.O. price 2s. 6d. net (or post free 2s. 8d.).

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Aug. 13	Aug. 20	Aug. 27	Sept. 3	Sept. 10	Sept 17	Sept. 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 22nd October, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
October				
Sunday 16	0.3	10.7	Overcast generally. Frequent rain until 16h. and from 23h.
Monday 17	7.2	10.6	Overcast until 7h. Few clouds until 11½h., cloudy until 16½h. Cloudless by 17½h. Frequent rain until 5½h.
Tuesday 18	0.0	10.6	Cloudless, becoming overcast by 1h. Frequent rain 4½h. until 23½h. Fresh wind 4h. until 8h. then strong until 21h.
Wednesday 19	6.0	10.5	Very cloudy until 3½h., little cloud until 12h., cloudy until 22h. then overcast. Rain from 22½h. Heavy from 23½h. Fresh wind 9h. until 16h.
Thursday 20	4.0	10.4	Overcast generally. Heavy rain with thunder and lightning until 0½h. Showery 11½h. until 15h. and frequent rain from 18½h.
Friday 21	2.5	10.4	Overcast until 13½h., cloudy until 15h., cloudless by 16h. Rain until 4½h. and 5½h. until 7h.
Saturday 22	1.5	10.3	Cloudless until 6½h., overcast by 7½h. Partially cloudy 18h. until 20h. then cloudless. Rain at times 8½h. until 10½h. and 16h. until 16½h.
		Sum 21.5	Sum 73.5	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 29.75 ins. at the beginning of the week to 29.44 ins. by 5½h. on October 17; increased to 29.72 ins. by 22h. on October 17; decreased to 29.29 ins. by 20½h. on October 18; increased to 29.55 ins. by 19½h. on October 19; decreased to 29.29 ins. by 3½h. on October 21; increased to 29.59 ins. by 0½h. on October 22; decreased to 29.43 ins. by 16½h. on October 22; increased and was 29.56 ins. by midnight on the same day.

GENERAL NOTES

1. **Introduction.**—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and the Astronomer Royal.

2. **Definitions of areas.**—"London"=administrative county of London: "Great Towns"=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; "C.B."=county borough, "M.B."=municipal borough; "U.D."=urban district. "Greater London"=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. **Non-civilian deaths** are excluded.

4. **Births and deaths** for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. **Cause of death** assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. **Notifications** of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part 1 (Medical).

7. **Summaries** of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

Smallpox

There were no deaths from Smallpox registered during the month of September.

Estimate of Births

(a) **Final estimate** of live births to be expected in the quarter ending 31st December, 1949 171,000

(b) **Provisional estimate** of live births to be expected in the quarter ending 31st March, 1950 186,000

In the above estimates regard has been had to (1) sample returns of the number of special ration books issued to expectant mothers by the Ministry of Food, and (2) the recent trend of registered live births. The sample comprises some 200 Food Office areas containing about 25 per cent. of the population.

Acute Poliomyelitis and Polioencephalitis

The following serial table, which will continue to be published during the present epidemic, shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 4	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29
Year: 1949	13	19	38	52	81	77	117	99	169	187	254	296	280	308	306	343	300	358	375	463	414	367
1948	22	14	15	31	38	25	38	45	39	43	39	78	77	73	76	74	73	88	86	88	80	70
1947	21	24	34	46	67	88	126	193	336	487	624	691	676	657	708	614	594	473	429	364	288	280

* Not corrected for revision of diagnosis.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(see General notes on page 2)

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Aug. 20	Aug. 27	Sept. 3	Sept. 10	Sept 17	Sept. 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 29th October, 1949, with totals from the first week of the year to date. } London.

(see General notes on page 2)

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 29th October, 1949.

England and Wales, Administrative
Areas and Port Health Districts.

(see General notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the “Others” column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenzal).	A	B	D	E	F	G	H	I	J	L	M	N	O	P	R	S
						Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute polioencephalitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

TABLE VI.—continued.

DATE.	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
Sunday 23	0.0	10.2	Cloudless until 5h., rapidly becoming overcast. Rain 7½h. until 11½h., slight rain 14h. until 16h. then rain or heavy rain until 19½h. Fresh wind 13h. until 18h.
Monday 24	0.4	10.2	Overcast, variably cloudy period 15h. until 21h. Solar halo 16h.
Tuesday 25	2.2	10.1	Overcast until 9h., generally cloudy until 21½h., then overcast. Rain at times 1h. until 8h., and from 14½h.. Fresh wind from 13h.
Wednesday .. 26	0.0	10.0	Overcast until 18½h., cloudless by 18½h. General rain until 14½h. then slight rain until 16½h. Fresh or strong wind until 7h. and 12h. until 17h.
Thursday . . . 27	5.7	10.0	Cloudless or nearly so. Mist and hoar frost in morning and at night.
Friday 28	3.5	9.9	Little cloud until 10½h., becoming overcast by 13h., clearing 21h., cloudless by 22h. Fog and hoar frost in morning. Drizzle 16h. until 17h. Solar halo 11h. until 12½h.
Saturday 29	0.0	9.9	Cloudless until 3h., overcast by 4½h. Cloudy 17h. until 20h., cloudless by 21½h. Hoar frost in morning. Mist from 21h. Lunar halo 18½h.—19½h.
No. of Column	Sum 11.8 25	Sum 70.3 26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer increased from 29.56 ins. at the beginning of the week to 29.58 ins. by 1½h. on October 23; decreased to 29.19 ins. by 18½h. on October 23; increased to 29.72 ins. by 22½h. on October 24; decreased to 28.87 ins. by 4h. on October 26; increased to 30.30 ins. by 8½h. on October 28; decreased to 30.19 ins. by 15½h. on October 29; increased and was 30.23 ins. by midnight on the same day.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN FOR
ENGLAND AND WALES

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 5th NOVEMBER, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and Astronomer Royal.

2. Definitions of areas.—“London”=administrative county of London: “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931: “C.B.”=county borough, “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

Acute Poliomyelitis and Polioencephalitis

The following serial table, which will continue to be published during the present epidemic, shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 11	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29	Nov 5
Year: 1949	19	38	52	81	77	117	99	169	187	254	296	280	308	306	343	300	358	375	463	414	367	330
1948	14	15	31	38	25	38	45	39	43	39	78	77	73	76	74	73	88	86	88	80	70	75
1947	24	34	46	67	88	126	193	336	487	624	691	676	657	708	614	594	473	429	364	288	280	243

* Not corrected for revision of diagnosis.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(See Notes on page 2)

Note.—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Aug. 27	Sept. 3	Sept. 10	Sept 17	Sept. 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29	Nov. 5	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 5th November, 1949, with totals from the first week of the year to date. } **London.**

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in
the week ended 5th November, 1949.

England and Wales, Administrative
Areas and Port Health Districts.

(See Notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

TABLE VI.—continued.

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer increased from 30.23 ins. at the beginning of the week to 30.36 ins. by 9½h. on October 31; decreased to 29.08 ins. by 15½h. on November 5; increased and was 29.19 ins. by midnight on the same day.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and Astronomer Royal.

2. Definitions of areas.—“London”=administrative county of London: “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough, “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have not been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General’s annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General’s Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General’s Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, total deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General’s Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, total deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

Acute Poliomyelitis and Polioencephalitis

The following serial table, which will continue to be published during the present epidemic, shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 18	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29	Nov 5	Nov 12

* Not corrected for revision of diagnosis.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(See Notes on page 2)

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 12th November, 1949, with totals from the first week of the year to date. } **London.**

TABLE VI.—continued.

DATE. 18 NOV 49 November	Registered Sunshine —in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
Sunday 6	5.4	9.4	Cloudless until 11h., cloudy 12h. until 16½h. overcast by 17½h., clearing 22h., cloudless by 22½h. Rain 19h. until 19½h. Mist until 21h.
Monday 7	5.1	9.3	Little cloud. Cloudy period 11½h. until 15h. and from 23h. Shower 1½h.
Tuesday 8	4.6	9.3	Generally cloudy until 19h. then overcast. Slight rain 7h. until 8h. Mist in morning.
Wednesday 9	0.0	9.2	Overcast until 15½h., little cloud by 16h. Frequent rain 2½h. until 12h. Mist from 15h. until 0h.
Thursday 10	6.6	9.2	Few clouds until 17h. then cloudy. Fresh wind 10h.—15h.
Friday 11	0.0	9.1	Cloudy until 3h. then overcast. Slight drizzle 10½h.—12½h. Rain 14½h.—15½h.
Saturday 12	2.6	9.1	Overcast until 4h., generally cloudy until 18h. then cloudless. Showery 10½h.—15½h. Strong wind 11h.—21h. then fresh.
No. of Column	25	26	
	Sum 24.3	Sum 64.6	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 29.19 ins. at the beginning of the week to 28.98 ins. by 0h. on November 7; increased to 29.66 ins. by 4½h. on November 9; decreased to 29.37 ins. by 14½h. on November 9; increased to 29.64 ins. by 0½h. on November 11; decreased to 29.43 ins. by 12h. on November 12; increased and was 29.49 ins. by midnight on the same day.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN FOR
ENGLAND AND WALES

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 19th NOVEMBER, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I, IV and IVa) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. Meteorological data (Tables V and VI) are supplied to the Registrar General by the Director, Meteorological Office, and Astronomer Royal.

2. Definitions of areas.—“London”=administrative county of London: “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough, “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General’s annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given in Table IVa). The numbers after correction for diagnosis are published in the Registrar General’s Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General’s Quarterly Return and final figures in the annual Statistical Reviews.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General’s Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

Acute Poliomyelitis and Polioencephalitis

The following serial table, which will continue to be published during the present epidemic, shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	June 25	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29	Nov 5	Nov 12	Nov 19

* Not corrected for revision of diagnosis.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(See Notes on page 2)

Note.—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Sept. 10	Sept 17	Sept. 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29	Nov. 5	Nov. 12	Nov. 19	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 19th November, 1949, with totals from the first week of the year to date. } London.

(See Notes on page 2)

CAUSES OF DEATH		Deaths registered from 1st week of the year. 1949	Deaths registered during current week.											
			ALL AGES.	Under 1 year.	1-2 years.	2-5 years.	5-15 years.	15-25 years.	25-35 years.	35-45 years.	45-55 years.	55-65 years.	65-75 years.	75 years and upwards.

TABLE VI.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
November				
Sunday 13	3.7	9.0	Nearly cloudless until 8h., few clouds until 12½h. then nearly overcast. Partially cloudy 16h. until 20h. then cloudless. Fresh wind until 3h.
Monday 14	4.3	9.0	Little cloud until 10h., partially cloudy until 15h. then sky veiled. Mist in morning. Fog from 21½h.
Tuesday 15	4.0	8.9	Little cloud. Fog until 16h. then mist. Dense fog 7h. until 9h. Hoar frost in morning and at night.
Wednesday 16	1.6	8.8	Cloudless until 9h., thin cloud until 14½h. then overcast. Mist until 1h. Fog 5½h. until 10h. Solar halo 10h. until 12h. Hoar frost in morning.
Thursday 17	0.1	8.8	Overcast. Slight rain or damping from 22h.
Friday 18	0.0	8.8	Overcast generally. Slight rain until 1h., 3½h. until 4½h. and rain 23½h. Foggy from 6h., dense at times 18h. until 23h.
Saturday 19	2.6	8.7	Overcast until 1h. partially cloudy until 13h. then overcast again. Rain from 18h. Foggy until 10h. then mist. Solar halo 10½h. until 12h.
		Sum 16.3	Sum 62.0	
No. of Column		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer increased from 29.49 ins. at the beginning of the week to 30.15 ins. by 10½h. on November 15; decreased to 29.26 ins. by 5h. on November 18; increased and was 29.46 ins by midnight on November 19.

1949 No. 47

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN FOR
ENGLAND AND WALES

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 26th NOVEMBER, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. The figures of new claims to sickness benefit made under the National Insurance Act, 1946, shewn in Table V are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied to the Registrar General by the Director, Meteorological Office, and Astronomer Royal.

2. Definitions of areas.—“London”=administrative county of London: “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough, “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General’s annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in Registrar General’s Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General’s Quarterly Return and final figures in the annual Statistical Reviews.

SPECIAL NOTE

By arrangement with the Ministry of National Insurance, there will be included in future issues of this Return figures of the new claims to sickness benefit made in each of the Standard Regions of England and Wales (for definitions *see* Explanatory Notes to the Registrar General’s annual Statistical Reviews) during the seven days ended the Tuesday of the week to which the Return relates. *See* Table V.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General’s Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

Smallpox

There were no deaths from Smallpox registered during the month of October.

Acute Poliomyelitis and Polioencephalitis

The following serial table, which will continue to be published during the present epidemic, shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	July 2	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29	Nov 5	Nov 12	Nov 19	Nov 26
Year: 1949	81	77	117	99	169	187	254	296	280	308	306	343	300	358	375	463	414	367	330	316	226	193
1948	38	25	38	45	39	43	39	78	77	73	76	74	73	88	86	88	80	70	75	63	52	47
1947	67	88	126	193	336	487	624	691	676	657	708	614	594	473	429	364	288	280	243	210	201	145

* Not corrected for revision of diagnosis.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(See Notes on page 2)

Note:—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Sept 17	Sept. 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29	Nov. 5	Nov. 12	Nov. 19	Nov. 26	Totals from 1st Week of year, in Great Towns ONLY

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 26th November, 1949, with totals from the first week of the year to date. } London.

- Notes: (1) The insured population entitled to claim sickness benefit consists broadly of the civilian population over school-leaving age and not retired from regular employment, who are either employed under a contract of service or self-employed (i.e., working on own account). Certain comparatively small classes (e.g., those married women, employed or self-employed, who rely on their husbands' insurance for benefit and persons who, because their employment is inconsiderable, are treated as non-employed), are not entitled to sickness benefit.
- (2) The figures include cases in which the claims to benefit may be disallowed on technical grounds, but this does not impair their validity as an indication of incapacity for work as claims have to be supported by medical evidence of incapacity.

TABLE VII.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
November				
Sunday 20	0.0	8.7	Overcast except for little cloud period 16h. until 20h. Rain or slight rain until 4h. Misty until 20h. Fresh wind from 23h.
Monday 21	2.5	8.6	Overcast until 10½h., partially cloudy until 15½h., little cloud until 19h. then overcast. Cloudless from 22h. Rain 0h. until 9½h. and 21½h. until 22½h. Fresh or strong wind until 9h.
Tuesday 22	1.9	8.6	Cloudless until 5½h. then variably cloudy. Slight rain 19h. until 19½h.
Wednesday 23	0.1	8.5	Cloudless until 4h., nearly overcast until 14½h. then overcast. Slight rain 5½h. until 9½h., 17½h. until 18½h. then rain. Mist in morning.
Thursday 24	0.0	8.5	Overcast. Rain until 4½h. and slight rain at times from 17½h.
Friday 25	0.0	8.4	Overcast. Frequent drizzle until 12h. then slight drizzle. Rain 4h. until 5½h. and from 23½h. Misty from 8h.
Saturday 26	0.0	8.4	Overcast. Rain until 0½h. and 4½h. until 11h. Frequent slight drizzle afterwards until 18½h. Misty.
No. of Column		Sum	Sum	
		4.5	59.7	
		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer increased from 29.46 ins. at the beginning of the week to 29.59 ins. by 12h. on November 20; decreased to 29.11 ins. by 9h. on November 21; increased to 29.27 ins. by 10½h. on November 22; decreased to 29.00 by 14½h. on November 23; increased and was 29.39 ins. by midnight on November 26.

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN FOR
ENGLAND AND WALES

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 3rd DECEMBER, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. The figures of *new* claims to sickness benefit made under the National Insurance Act, 1946, shewn in Table V are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied to the Registrar General by the Director, Meteorological Office, and Astronomer Royal.

2. Definitions of areas.—“London”=administrative county of London: “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough, “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General’s annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General’s Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General’s Quarterly Return and final figures in the annual Statistical Reviews.

SPECIAL NOTE

By arrangement with the Ministry of National Insurance, there are included in this Return figures of the *new* claims to sickness benefit made in each of the Standard Regions of England and Wales (for definitions see Explanatory Notes to the Registrar General’s annual Statistical Reviews) during the seven days ended the Tuesday of the week to which the Return relates. See Table V.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General’s Quarterly Return).
(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

Acute Poliomyelitis and Polioencephalitis

The following serial table, which will continue to be published during the present epidemic, shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	July 9	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29	Nov 5	Nov 12	Nov 19	Nov 26	Dec. 3

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 3rd December, 1949, with totals from the first week of the year to date. } London.

- Notes: (1) The insured population entitled to claim sickness benefit consists broadly of the civilian population over school-leaving age and not retired from regular employment, who are either employed under a contract of service or self-employed (i.e., working on own account). Certain comparatively small classes (e.g., those married women, employed or self-employed, who rely on their husbands' insurance for benefit and persons who, because their employment is inconsiderable, are treated as non-employed), are not entitled to sickness benefit.
- (2) The figures include cases in which the claims to benefit may be disallowed on technical grounds, but this does not impair their validity as an indication of incapacity for work as claims have to be supported by medical evidence of incapacity.

DATE.		Registered Sunshine in hours.		Sun above Horizon in hours.		GENERAL REMARKS.
November		PAID				
Sunday 27	0.0	8.3	Overcast or nearly so. Fog 4h. until 9h. then slight mist.		
Monday 28	0.7	8.3	Overcast until 8½h., generally cloudy until 18h. then cloudless. Shower 15½h. Slight mist throughout.		
Tuesday 29	0.5	8.3	Cloudless until 5h., very cloudy until 12h. then thin cloud. Overcast from 23½h. Hoar frost in morning. Mist or fog 6h. until 21h.		
Wednesday 30	0.0	8.2	Overcast generally. Mist in morning. Damping 12h. until 13½h.		
December						
Thursday 1	0.0	8.2	Overcast or nearly so. Rain or slight rain 18½h. until 21½h. Slight mist.		
Friday 2	1.1	8.2	Very cloudy until 4h., few clouds until 11½h. sky veiled by 12h. Overcast from 20h. Slight mist.		
Saturday 3	0.0	8.1	Overcast generally. Occasional slight rain 0½h. until 12½h. Fresh wind 2h. until 3h. then strong wind or moderate gale.		
No. of Column		Sum 2.3	Sum 57.6			
		25	26			

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer increased from 29.39 ins. at the beginning of the week to 29.99 ins. by 9½h. on November 29; decreased to 29.57 ins. by 1h. on December 2; increased to 29.85 ins. by 19½h. on December 2; decreased and was 29.30 ins. by midnight on December 3.

1949 No. 49

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN FOR
ENGLAND AND WALES

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 10th DECEMBER, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE
1949

Sixpence net

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. The figures of *new* claims to sickness benefit made under the National Insurance Act, 1946, shewn in Table V are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied to the Registrar General by the Director, Meteorological Office, and Astronomer Royal.

2. Definitions of areas.—“London”=administrative county of London: “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough, “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General’s annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General’s Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General’s Quarterly Return and final figures in the annual Statistical Reviews.

SPECIAL NOTE

By arrangement with the Ministry of National Insurance, there are included in this Return figures of the *new* claims to sickness benefit made in each of the Standard Regions of England and Wales (for definitions see Explanatory Notes to the Registrar General’s annual Statistical Reviews) during the seven days ended the Tuesday of the week to which the Return relates. See Table V.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General’s Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

Acute Poliomyelitis and Polioencephalitis

The following serial table, which will continue to be published during the present epidemic, shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947.

Week Ended	July 16	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct 1	Oct 8	Oct 15	Oct 22	Oct 29	Nov 5	Nov 12	Nov 19	Nov 26	Dec 3	Dec 10

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 10th December, 1949, with totals from the first week of the year to date. } London.

- Notes: (1) The insured population entitled to claim sickness benefit consists broadly of the civilian population over school-leaving age and not retired from regular employment, who are either employed under a contract of service or self-employed (i.e., working on own account). Certain comparatively small classes (e.g., those married women, employed or self-employed, who rely on their husbands' insurance for benefit and persons who, because their employment is inconsiderable, are treated as non-employed), are not entitled to sickness benefit.
- (2) The figures include cases in which the claims to benefit may be disallowed on technical grounds, but this does not impair their validity as an indication of incapacity for work as claims have to be supported by medical evidence of incapacity.

TABLE VI.—Air Temperature and Rainfall in the week ended 10th December, 1949. } Certain Great Towns in England and Wales and four Scottish and Irish Towns.

TABLE VII.—continued.

DATE	Registered Sunshine in hours.		Sun above Horizon in hours.		GENERAL REMARKS.
December	49				
Sunday	..	27	5.8	8.1	Overcast until 4h., clearing to little cloud by 4½h. Moderate gale until 5h., strong wind until 15h. then fresh wind.
Monday	..	28	0.7	8.1	Cloudless until 1½h., cloudy generally until 17h. then nearly overcast. Occasional rain 12½h. until 13½h. Fresh wind until 1h. and 4h. until 15h.
Tuesday	..	29	0.0	8.0	Overcast generally. Rain at times 4½h. until 9h. Mist 7h. until 17h. Fresh wind from 19h.
Wednesday	..	30	1.0	8.0	Overcast until 3h., cloudy until 12½h. then overcast. Occasional slight rain or damping from 12½h. Fresh wind until 1h. and fresh or strong wind from 5h.
Thursday	..	1	0.0	8.0	Overcast until 15h., cloudless by 16h. Slight rain until 0½h., and rain heavy at first, 1½h. until 5½h. Fresh wind until 2h. Hoar frost at night.
Friday	..	2	3.7	8.0	Cloudless, overcast by 0½h. Partially cloudy 7h. until 14h. then overcast generally. Rain 1½h. until 2½h. Hoar frost in morning. Mist at night.
Saturday	..	3	0.0	8.0	Overcast until 14½h., cloudy until 23h. then few clouds. Mist and hoar frost in morning. Slight snow 9½h. until 10h. then frequent sleet until 12h.
No. of Column		25	Sum 11.2	Sum 56.2	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 29.30 ins. at the beginning of the week to 29.19 ins. by 3½h. on December 4; increased to 29.60 ins. by 0½h. on December 5th; decreased to 29.46 ins. by 12h. on December 5; increased to 29.71 ins. by 9h. on December 6; decreased to 29.22 ins. by 2h. on December 9; increased and was 30.00 ins. by midnight on December 10th.

1949 No. 50

GENERAL REGISTER OFFICE

THE REGISTRAR GENERAL'S
WEEKLY RETURN FOR
ENGLAND AND WALES

BIRTHS AND DEATHS, INFECTIOUS DISEASES, WEATHER

WEEK ENDED

SATURDAY, 17th DECEMBER, 1949

Crown Copyright Reserved.

LONDON: HIS MAJESTY'S STATIONERY OFFICE

1949

Sixpence net

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. The figures of *new* claims to sickness benefit made under the National Insurance Act, 1946, shewn in Table V are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied to the Registrar General by the Director, Meteorological Office, and Astronomer Royal.

2. Definitions of areas.—“London”=administrative county of London: “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough, “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General’s annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General’s Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General’s Quarterly Return and final figures in the annual Statistical Reviews.

SPECIAL NOTE

By arrangement with the Ministry of National Insurance, there are included in this Return figures of the *new* claims to sickness benefit made in each of the Standard Regions of England and Wales (for definitions *see* Explanatory Notes to the Registrar General’s annual Statistical Reviews) during the seven days ended the Tuesday of the week to which the Return relates. *See* Table V.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General’s Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

Acute Poliomyelitis and Polioencephalitis

The following serial table shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947. The table will not be continued after the end of the year, but the number of weekly notifications will continue to be shewn in Table IV.

Week Ended	July 23	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct. 1	Oct. 8	Oct. 15	Oct. 22	Oct. 29	Nov 5	Nov 12	Nov 19	Nov 26	Dec. 3	Dec. 10	Dec. 17
Year: 1949	99	169	187	254	296	280	308	306	343	300	358	375	463	414	367	330	316	229	193	157	134	93

* Not corrected for revision of diagnosis.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(See Notes on page 2)

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Oct. 8	Oct. 15	Oct. 22	Oct. 29	Nov. 5	Nov. 12	Nov. 19	Nov. 26	Dec. 3	Dec. 10	Dec. 17	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 17th December, 1949, with totals from the first week of the year to date. } London.

(See Notes on page 2)

- Notes: (1) The insured population entitled to claim sickness benefit consists broadly of the civilian population over school-leaving age and not retired from regular employment, who are either employed under a contract of service or self-employed (i.e., working on own account). Certain comparatively small classes (e.g., those married women, employed or self-employed, who rely on their husbands' insurance for benefit and persons who, because their employment is inconsiderable, are treated as non-employed), are not entitled to sickness benefit.
- (2) The figures include cases in which the claims to benefit may be disallowed on technical grounds, but this does not impair their validity as an indication of incapacity for work as claims have to be supported by medical evidence of incapacity.

No. of Column		25	26		

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean readings of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer increased from 30.00 ins. at the beginning of the week to 30.24 ins. by 9½h. on December 12; decreased to 29.21 ins. by 5h. on December 15; increased to 29.66 ins. by 3h. on December 16; decreased to 29.20 ins. by 7½h. on December 17; increased and was 29.52 ins. by midnight on the same day.

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. The figures of *new* claims to sickness benefit made under the National Insurance Act, 1946, shewn in Table V are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied to the Registrar General by the Director, Meteorological Office, and Astronomer Royal.

2. Definitions of areas.—“London”=administrative county of London: “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough, “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General’s annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General’s Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General’s Quarterly Return and final figures in the annual Statistical Reviews.

SPECIAL NOTE

By arrangement with the Ministry of National Insurance, there are included in this Return figures of the *new* claims to sickness benefit made in each of the Standard Regions of England and Wales (for definitions *see* Explanatory Notes to the Registrar General’s annual Statistical Reviews) during the seven days ended the Tuesday of the week to which the Return relates. *See* Table V.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics *see* the Registrar General’s Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January.
Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

Acute Poliomyelitis and Polioencephalitis

The following serial table shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947. The table will not be continued after the end of the year, but the number of weekly notifications will continue to be shewn in Table IV.

Week Ended	July 30	Aug 6	Aug 13	Aug 20	Aug 27	Sept 3	Sept 10	Sept 17	Sept 24	Oct 1	Oct 8	Oct 15	Oct 22	Oct 29	Nov 5	Nov 12	Nov 19	Nov 26	Dec 3	Dec 10	Dec 17	Dec 24

* Not corrected for revision of diagnosis.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(See Notes on page 2)

*Note:—*The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

Week ended:—	Oct. 15	Oct. 22	Oct. 29	Nov. 5	Nov. 12	Nov 19	Nov. 26	Dec. 3	Dec. 10	Dec. 17	Dec. 24	Totals from 1st Week of year, in Great Towns <i>ONLY</i>

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

** Return not received.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 24th December, 1949, with totals from the first week of the year to date. } London.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in } England and Wales, Administrative
the week ended 24th December, 1949. } Areas and Port Health Districts.

(See Notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

- Notes: (1) The insured population entitled to claim sickness benefit consists broadly of the civilian population over school-leaving age and not retired from regular employment, who are either employed under a contract of service or self-employed (i.e., working on own account). Certain comparatively small classes (e.g., those married women, employed or self-employed, who rely on their husbands' insurance for benefit and persons who, because their employment is inconsiderable, are treated as non-employed), are not entitled to sickness benefit.
- (2) The figures include cases in which the claims to benefit may be disallowed on technical grounds, but this does not impair their validity as an indication of incapacity for work as claims have to be supported by medical evidence of incapacity.

TABLE VII.—continued.

DATE.	Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
Sunday 18	0.0	7.8	Cloudless until 7h., partially cloudy until 9h., then overcast. Rain or slight rain 13h., until 19½h. Strong wind 0h. until 2h. and from 18h.
Monday 19	2.7	7.8	Generally cloudy until 11h. then little cloud. Overcast period 17½h. until 19½h. Strong wind until 6h. then fresh until 18h. Slight rain 18h. until 19½h.
Tuesday 20	3.1	7.8	Little cloud until 11½h. generally cloudy until 19½h., cloudless by 20h. Mist and hoar frost in morning and at night.
Wednesday .. 21	5.7	7.8	Cloudless generally. Overcast period 2h. until 5h. Shower 2½h. Mist and hoar frost in morning and at night.
Thursday 22	1.6	7.8	Cloudless until 7½h., generally cloudy until 15h., then overcast. Mist and hoar frost in morning. Rain 22h. until 23h.
Friday 23	0.0	7.8	Overcast. Fog from 7h. Occasional slight damping 12h. until 21h.
Saturday 24	0.0	7.8	Overcast. Mist or fog throughout.
		Sum	
		54.6	
No. of Column	5	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer increased from 29.52 ins. at the beginning of the week to 29.63 ins. by 10½h. on December 18; decreased to 29.18 ins. by 1½h. on December 19; increased to 30.34 ins. by 22h. on December 23; decreased and was 30.10 ins. by midnight on December 24.

1949

Sixpence net

NOTES

1. General.—The figures in this Return are provisional. Births and deaths (Tables I, II and III) and notifications of infectious diseases (Tables I and IV) are compiled from returns furnished to the Registrar General by Registrars of births and deaths and Medical Officers of Health respectively. The figures of *new* claims to sickness benefit made under the National Insurance Act, 1946, shewn in Table V are supplied by the Ministry of National Insurance. Meteorological data (Tables VI and VII) are supplied to the Registrar General by the Director, Meteorological Office, and Astronomer Royal.

2. Definitions of areas.—“London”=administrative county of London: “Great Towns”=London, all county boroughs and, in addition, municipal boroughs and urban districts within whose present area there was a resident population exceeding 50,000 at the Census, 1931; “C.B.”=county borough, “M.B.”=municipal borough; “U.D.”=urban district. “Greater London”=aggregate of the city of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946, i.e., an area of approximately 15 miles radius from Charing Cross.

3. Non-civilian deaths are excluded.

4. Births and deaths for Greater London, London and the other Great Towns are those registered in the area and have *not* been allocated to the area of residence.

5. Cause of death assignments (Tables II and III) are provisional, and final figures are compiled annually, those for Greater London, London and the County Boroughs are distinguished separately in Tables 24 and 24A of the Registrar General's annual Statistical Review, Tables, Part I (Medical).

6. Notifications of infectious diseases are the numbers originally notified (late notifications are given at the end of Table IV). The numbers after correction for diagnosis are published in the Registrar General's Quarterly Return and Statistical Review, Tables, Part I (Medical).

7. Summaries of the Weekly Returns adjusted for late returns or corrections are published in the Registrar General's Quarterly Return and final figures in the annual Statistical Reviews.

SPECIAL NOTE

By arrangement with the Ministry of National Insurance, there are included in this Return figures of the *new* claims to sickness benefit made in each of the Standard Regions of England and Wales (for definitions see Explanatory Notes to the Registrar General's annual Statistical Reviews) during the seven days ended the Tuesday of the week to which the Return relates. See Table V.

NON-WEEKLY STATISTICS

The following additional information relating to England and Wales as a whole is published on this page immediately below this note as soon as available:—

Monthly Deaths from smallpox—about the fourth week following the month.

Quarterly (a) Numbers and rates of live births, stillbirths, *total* deaths and deaths of children under 1 year of age—about the third week following the quarter. (For further quarterly statistics see the Registrar General's Quarterly Return).

(b) Final forecast of the number of births to be expected in the current quarter and a provisional similar forecast for the following quarter—by the end of the first month of each quarter.

Annual Numbers and rates of live births, stillbirths, *total* deaths, and deaths of children under one year of age—about the third week in January. Civilian death-rates from Tuberculosis and Cancer and also Maternal Mortality—about the end of April.

Smallpox

There were no deaths from Smallpox registered during the month of November.

Acute Poliomyelitis and Polioencephalitis

The following serial table shows the weekly notifications* of acute poliomyelitis and polioencephalitis in England and Wales in 1949 compared with those of the corresponding weeks in 1948 and 1947. The table will not be continued after the end of the year, but the number of weekly notifications will continue to be shewn in Table IV.

TABLE I.—Births, Deaths (distinguishing Deaths of Infants under 1 year of age) and Notifications of certain Infectious Diseases in the last 11 weeks with totals for the current and the two preceding years.

(a) London.

(b) Great Towns in the aggregate.

(See Notes on page 2)

Note.—The deaths are not comparable with notifications if only because a certain number of deaths occur in the Great Towns (e.g. in hospitals) of cases which were notified in areas outside the Great Towns.

* These Great Towns do not comprise the whole of Greater London and the figures given do not aggregate to the Greater London total.

† The numbers of Deaths are provisionally corrected by transfer to place of normal residence, if in Scotland. Deaths of non-civilians are included.

‡ The numbers of Births and Deaths are provisionally corrected by the exclusion of all non-residents in the case of Belfast and of those occurring in institutions in Dublin. Returns of stillbirths are not made for these towns.

§ Except for London, this column includes all deaths where the term "Influenza" is mentioned on the certificate, e.g., influenzal pneumonia.

TABLE III.—Deaths (classified in accordance with the Abridged List* and at different age periods) registered in the week ended 31st December, 1949, with totals from the first week of the year to date. } London.

* The relationship of the Abridged List to the International List is shown in the Explanatory note 4 "Causes of Death" on page v of the Registrar General's Statistical Review, Tables, Part I (Medical).

TABLE IV.—Notification of Infectious Diseases in England and Wales, Administrative Areas and Port Health Districts.
the week ended 31st December, 1949.

(See Notes on page 2)

Note:—Where no return has been received an asterisk * is inserted in the columns. Totals shown against the names of counties include any associated county boroughs. Letters in the "Others" column denote the diseases so lettered in the summary headings. Puerperal fever is included with puerperal pyrexia except in London.

	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenza).	A	B	D	E	F	G	H	I	J	L	M	N	O	P	R	S
	Scarlet fever.	Whooping cough.	Diphtheria.	Measles, excluding rubella.	Acute pneumonia (primary or influenza).	Cholera.	Plague.	Cerebro-spinal fever.	Acute poliomyelitis.	Acute polioencephalitis.	Acute encephalitis lethargica.	Typhus fever.	Relapsing fever.	Continued fever. (London only).	Dysentery.	Ophthalmia neonatorum.	Puerperal pyrexia and Puerperal fever.	Smallpox.	Paratyphoid.	Typhoid.	Food poisoning.

- Notes: (1) The insured population entitled to claim sickness benefit consists broadly of the civilian population over school-leaving age and not retired from regular employment, who are either employed under a contract of service or self-employed (i.e., working on own account). Certain comparatively small classes (e.g., those married women, employed or self-employed, who rely on their husbands' insurance for benefit and persons who, because their employment is inconsiderable, are treated as non-employed), are not entitled to sickness benefit.
- (2) The figures include cases in which the claims to benefit may be disallowed on technical grounds, but this does not impair their validity as an indication of incapacity for work as claims have to be supported by medical evidence of incapacity.

TABLE VI.—Air Temperature and Rainfall in the week ended 31st December, 1949.

Certain Great Towns in England and Wales and four Scottish and Irish Towns.

TABLE VII.—continued.

DATE.		Registered Sunshine in hours.	Sun above Horizon in hours.	GENERAL REMARKS.
December				
Sunday 25	0.0	7.8	Overcast or nearly so. Mist in morning. Fresh wind 16h. until 21h. then strong.
Monday 26	0.0	7.8	Overcast generally. Rain or slight rain 3½h. until 4½h. and drizzle 16h. until 20h. Strong wind until 4h. then fresh until 8h.
Tuesday 27	0.0	7.9	Overcast until 16h., cloudless by 17½h. Mist in afternoon.
Wednesday 28	0.0	7.9	Cloudless until 2h., overcast generally from 3½h. Slight rain 11½h. until 12½h.
Thursday 29	0.0	7.9	Overcast until 13h., cloudless by 13½h. Mist from 7h., foggy 21½h. until 23h.
Friday 30	2.8	7.9	Cloudless generally until 23½h. then clouding up. Misty until 14h., foggy 2½h. until 5½h. Hoar frost in morning, dew at night.
Saturday 31	0.0	7.9	Overcast generally. Dew in morning.
No. of Column		Sum 2.8	Sum 55.1	
		25	26	

The results apply to the civil day or from midnight to midnight, Greenwich Mean Time. The height of the cistern of the barometer is 152 feet above the mean level of the sea; no correction has been applied to the readings to reduce to sea level.

Observations are usually taken at 9h. A.M., noon, 3h. P.M., and 9h. P.M. The means of the eye-readings of the barometer, the dry bulb thermometer and the wet bulb thermometer are converted into mean daily values by the application of corrections deduced from a discussion of the photographic records made during the 50 years ending 1903. With the corrected mean reading of the dry bulb thermometer, is combined the corrected mean of the readings of the maximum and minimum thermometers, forming the mean daily value of the temperature of the air (column 7). The mean daily dew point temperature and degree of humidity are deduced from the mean daily values of the dry and wet bulb thermometers by Hygrometrical Tables, published by the Meteorological Office, Air Ministry.

The average temperature of the air is that derived from a discussion of the observations made at Greenwich during the 65 years ending 1905, and that of horizontal movement of the air from a discussion of the anemometric records for the 50 years ending 1916. In reading columns 8 and 23 it will be borne in mind that + indicates "higher" and — "lower" than the average.

The values given in column 16 are not corrected for the index error of the thermometer, which cannot be determined.

The numbers in column 26, derived from the Campbell Stokes Sunshine Instrument show the aggregate duration of *brigh* sunshine on each day.

The reading of the barometer decreased from 30.10 ins. at the beginning of the week to 29.55 ins. by 2½h. on December 26; increased to 29.99 ins. by 2½h. on December 28; decreased to 29.71 by 13½h. on December 30; increased and was 30.24 ins. by midnight on December 31.
